FRANCE WOULD DEFER FOREIGN LOAN PROBLEM

Paris Intends to Satisfy Claims but Concentrates on Restoring Finance

DEFICIT IS FOUND IN THE 1925 BUDGET

Proposal Made That Contributions Under Dawes Project Be Applied to Creditors

> By SISLEY HUDDLESTON By Special Cable

States Government is preparing to Although the report is unconfirmed follows: here, it is possible to give an indi-cation of the views of Joseph Cail-laux, the Finance Minister, regarding repayment. Eventually France intends to satisfy all claims, but for the moment it is surely apparent to the world, says an authoritative Frenchman, that attention must be confined to the restoration of French

finances.

M. Caillaux's first task is filling up the holes in the budget and in the Treasury. Later he hopes to establish brand new financial machinery, but in the meantime he will be a stable up a stating instruhave to patch up existing instru-ments. M. Calllaux finds that even the 1925 budget, which was declared to be balanced, in reality shows a deficit of several milliard francs, and it is his purpose to obtain a true equilibrium by including all treasury charges in the budgetary esti-mate, with a corresponding increase of both direct and indirect taxes. Afterward, important fiscal reforms of a far-reaching character will be

Setting Its House in Order Now it is obvious that France has an arduous task to set its financial house in order, without reference to debts abroad. The moment is considered inopportune to raise the question of external loans. But M. Caillaux, it is believed, has already ormulated a maxim which he expressed to the American Ambassador, Myron T. Herrick, that such payments as possible should come from France's share of the German contributions toward war expenses the Washington Government had sent under the Dawes plan. The annual amount received would be considerable and it would be possible to set it aside for special purposes.

The German payments were originally meant for the received was taken was "again" in progress was taken

nally meant for the repair of the as reference to the rumored dis-ruined north, but France has, un-aided, come within sight of the com-Myron T. Herrick, last week of inpletion of this work. It has thus assumed a heavy burden of internal suggestions he was asked to lay Nevertheless, apart from cer-sums, still undetermined, allo-sations he might have with them. tain sums, still undetermined, allo-cated to the devastated regions this German annuity would serve to apply to France's creditors. If and when M. Caillaux sends a funding mission to America it will have instructions to terms of settlement structions to make the discussions or that they marked any change in the policy of the Washington Governrevolve round this point.

Diplomatic Pressure

Statistics issued by Seymour Parker Gilbert show that Germany front on the question of accepting an paid the Allies 59,880,100 gold marks in the month of April. Since September last the Reich has paid 640,-000,000 gold marks, and by the end of August it will have paid 1,000,000,000 gold marks. The amount will grow each year. France's share is 52 per

sages concerning the drafting of a tween the two governments was exnote calling France strongly to account, there is no confirmation here been absent several days from Paris but last Tuesday he had a conversation of great importance with M. Caillaux on the obligations of France to America. After the conversation Mr. Herrick sent a long report to Washington. If the American Government decided to act further it was evidently as the result of such a

Secret British Document Said to Reveal Policy in Europe

Memorandum Shows Position With Regard to Germany, France, Other States and League

Reprinted from the New York World Copyright (New York World) Press Publishing Company, 1925. NEW YORK, May 11—The World yesterday published a lengthy cable from its London correspondent, John L. Balderston in which he gave what purports to be the full text of a memorandum on British European policy. This, it is stated, was sent from the Foreign Office on Feb. 20 by Austen Chamberlain, Foreign Secretary. This secret document, it is added, was prepared for the pur-pose of convincing the British Cabinet that a new entente between Great Britain, France and Belgium PARIS, May 11—Messages from should be concluded. This view, the America indicate that the United dopting the German proposals for a pact of mutual guarantees between press France to make early arrange-ments for the funding of its debt. The text of the memorandum, in part,

> Europe today is divided into three main elements, namely, the victors, the vanquished and Russia.
>
> The Russian problem, that incessant though shapeless menace, can be stated only as a problem; it is impossible to foresee what effect the development of Russia will have on the future stability of Europe. It is true, on the one hand, that the feeling of uncertainty which is samping true, on the one hand, that the feeling of uncertainty which is sapping the health of Western Europe is caused to no small extent by the disappearance of Russia as a power accountable in the European concert. On the other hand, the Russian problem is for the moment rather Asiatic than European; tomorrow Russia may again figure decisively in the balance of Continental power, but today she hangs as a storm cloud upon the Eastern horizon of Europe

—impending, imponderable, but, for the present, detached. Russia is not, therefore, in a sense, a factor of sta-bility; she is, indeed, the most men-acing of our uncertainties, and it must be in spite of Russia, perhaps even because of Russia, that a policy of security must be framed. Central Europe

The condition of central and western Europe, though scarcely less un-certain, is at least more definable. The main psychological factors in such cases are almost the same. All

such cases are almost the same. All our late enemies continue full of resentment at what they have lost; all our late Allies are fearful of losing what they have won.

The smaller ex-enemies, Austria, Hungary and Bulgaria, are so completely surrounded and overpowered by their neighbors that for them revenge has become a sullen subjective emotion rather than an objective political hope.

The attitude of Germany. Although Germany is at present quite incapable of undertaking aggressive action, it is certain that with great military chemical potentialities she will sooner or later again become a powerful military factor.

For the moment it may well be the state of the surrounded that the same intalligent Germans.

For the moment it may well be true that more intelligent Germans desire peace; they feel that Germany must first re-establish her economic and financial position. . . . On the other hand, they are aware that one day Germany will again be strong. There are but few Germans who seriously hope to exert this strength, when reacquired, against the British Empire. It may be doubted even if the majority of Germans today desire a war of revenge against France; but it may be confidently asserted that as soon

DEBT PARLEYS AGAIN RESUMED

Washington Confirms Reports of Conversations Relative to French Settlement

WASHINGTON, May 11 (AP) - Informal conversations relative to a French debt settlement are again in progress, it was disclosed today at the State Department. Confirming the fact of negotiations for the first time, the department reiterated that

structions believed to outline the

No Definite Project There was nothing to indicate that three instructions included any deflment as to the form of settlements. It was said flatly that the Washington Government had not changed

assignment of German reparation

payments by France in working out

a debt settlement agreement.

Special from Monitor Bureny WASHINGTON, May 11-Confidence that the question of the payment of the French war debt to the United States would soon be the subject of active negotiations bepressed by a high official here today to a representative of The Christian Science Monitor. This view is borne out by recent expressions from Paris and reports from American officials in the French capital, as well as by the personal contact of some of the higher officials of the Washington Administration with those of the French Government.

France Needs Loans

That an agreement by the French Government to begin payments on its debt to this country and the time for Hindenburg's election. largely dependent upon the status of French finance, was made plain by the official giving the information Not that the validity of the debt itself is in any way dependent upon the financial condition of France from the viewpoint of the French people. No suggestion has been made them or their officials that the debt be canceled, according to the authority quoted, who is thoroughly and intimately conversant with all phases of the situation.

France is looking to the United States for continued financial assistance in the form of loans. To make it easier to effect them it must do MAY NOT BE RENEWED something toward starting the liquidation of its present debt to this Government. That France is in very poor condition to do anything in the way of payments to the United condition is far from satisfactory

Beer Making Thwarted by Padlock in Chicago

Special from Monitor Bureau Chicago, May 11

CHICAGO'S twenty-sixth brewery has been padlocked for a year for violation of the national prohibition law, and with its closing by injunction its use has been so restricted as to thwart any surreptitious beer making there in the next 12 months. The place has been virtually closed for nearly year with a United States marshal standing guard on the premises but this find court action marks its total eclips

Jacob I. Grossman, assistant United States Attorney, who handled the case, said: "The decree closes up the racking room, the permitting only such part of it as needed for making malt extrac for bakers. It will not be possible to make beer there."

Some beer on the premises also to be destroyed.

ENTENTE HEARS

Major Problems, on Russia, Austria, Poland, Greece, Are Not Discussed

By Special Cable BUCHAREST, Rumania, May 11-Discussions at the Little Entente Conference, now taking place at Bucharest, appear to indicate that the foreign ministers of Czechoslovakia, Jupean problems, such as Russian re-lations, Austria's future, and even treaty. the entry of Poland and Greece into the Entente-in which the individual and immediate interests of the Little Entente states naturally conflict Nevertheless, the conversations are

affording an excellent opportunity for a frank exchange of viewpoints on such pressing matters as the Bulgarian situation the growing Communist propaganda in the Balkans. Hungary's military program.

The Entente is now at the parting of the ways. Its principal raison d'être-protection against a possible Austro-Hungarian imperial-

Advertising Men Proclaim Purpose of Preventing War

Peace Won by Truth Is Their Message From **Houston Pulpits**

HOUSTON, Tex., May 11 (Special) -"Preservation of peace through the instrumentality of the white light of truth" was the gospel preached from nearly a score of Houston pulpits by delegates to the Associated Advertising Clubs of the World convention,

here, Sunday.

Louis E. Holland, president of the association, sounded the keynote when he declared at the First Methodist Church: "We are weary of war; we are not pacifists, but we know that every war since Napoleon's time has been a business war. and it is the supreme mission of the advertising clubs to prevent future We are ready to take our chances

in the world markets without the application of force. We would not sell our wares at the price of blood."

Tenets of the Way-shower William Bayless of Cleveland, O. in an address, laid the blame for the present unrest in the industrial world to the failure of management to devote enough time to the solution of the human problems involved in instudy of technical and material prob-

lems, management has been guilty of a neglect that will require remedying. He said he recommended "the publication of the tenets of the Way Shower, which he doubtless envolved In addition, the committee is ask-in his working years for bringing ing for equal work, no limitation on the threatening and discordant elements into harmony with each other."
Five thousand delegates and visitors are in attendance at the convention, which formally opened for

business sessions Monday morning. HOUSTON, Tex., May 11 (A)-Advertising is becoming a vital force in economic life and an integral part of the foundations of civilization. It has laid upon its practitioners new duties and new responsibilities. Herbert Hoover, Secretary of Commerce, told the Associated Advertising Clubs of the World in session here.

DRY FORCE RAID AT SOMERVILLE MARKS RECORD

State Police Seize Liquor Stocks in District Held Safe From Interference

MR. READING TO DEMAND JAIL TERMS FOR GUILTY

Crusade on Bootleggers and Gangsters to Be Thorough, Says District Attorney

Jail sentences will be demanded. regardless of whether it is first or second conviction, Arthur K. Reading, district attorney of Middlesex County, announced today as he was preparing to launch the prosecution leged bootleggers and proprietors of liquor-selling establishments who were caught in one of the most spectacular and effective dry raids ever conducted in Massachusetts, in which the so-called rum section of Somerville, long considered "safe" from the police, was put out of operation

Determined to carry his campaign to the ultimate routing of every fla grant violator of the prohibition law, the district attorney said that, failing to obtain the fail sentences in the East Cambridge Superior Court, where the cases soon will go No matter how fine an addition to trial, he will seek the deportation of the criminals as undesirable aliens, and will invoke the federal padlock law to close up every disreputable resort in Somerville.

Court Notices Posted

More than a score of houses and other shops in the "Brick Bottom" district of the city were posted with court notices today, following the systematic *crusade Saturday night "Modern advertising is the hand- and Sunday morning which was under the personal leadership of Mr. Reading and Brig.-Gen. Alfred F. Foote, head of the Department of Public Safety.

Secretly planned for several months during which time carefully selected attaches of the district attorney's office quietly gathered evicompiled the names of all bootleg-gers and other criminals, studied dividual house, store and apartment in which the liquor traffic was being carried on, the raid was conducted with crushing success when the word was given at 9 o'clock Satur-

day evening. Forty-six persons out of 51 previously sought individually on capiases for liquor violations were arrested in the single coup over the weekend, as well as hundreds of gallons of various liquors, 50 barrels of wine, nu-

merous stills and presses being seized. Crusade to Continue "The fight is on to the finish," Mr Reading declared today. "This raid may be taken as the beginning of the end. We may not be able at once to drive every single bootlegger out of Middlesex County, but this raid should serve notice on all gangsters

and bootlegging syndicates that the to the end. "There will be no let-up in the vigilance which we shall keep, and WASHINGTON, May 11 (P)-An additional complaints will be issued American delegation, headed by L. C. against a number of defendents as a Andrews, Assistant Secretary of the result of the seizures. We have stud-

itself is declared by independent observers to be lax. The dry law is often flouted in circles where reflouted in circles where re-would be the natural expectation. Failure of officials to take necessary action, due in part to political influence, is credited with much of the cause of the negligence.

Rumors of a celebration in an East Side section were reported to the authorities and promise received that they would act, it is declared. How-ever, on the night of the ball beer was sold to men, women and children, and other liquors were also

dispensed, say observers. Announcements of action to be taken have accordingly in many instances lost their effect among critics of the situation who honestly wish for enforcement, as they feel that the situation here is not what might be expected from the enforcement standpoint despite the handicaps placed on Detroit through

there was a balance of \$1,300,000 profit to the American company last year, said Mr. Heiss, but that this figure did not allow for contingencies nor return on patents. Mr. CONFLICTING TELEPHONE COST STATEMENTS ARE EXPLAINE STATEMENTS ARE EXPLAINED

Replacement of Equipment at Higher Prices Declared Important Factor in Determining Investment in Unit of Service

In the hearing before the Department of Public Utilities on the petition of the New England Telephor sion to inaugurate a general rate in-crease, the matter of the plant cost or the average price the company has invested in each particular operating telephone instrument has been a subject of persistent inquiry. E. Mark Sullivan, corporation counsel for the City of Boston and in charge of the side of the protestants, has been emphasizing determination of this fac-

Matt B. Jones, president of the company, made what was to the layman a contradictory statement, under cross-examination by Mr. Sullivan when he said that the average plant cost per telephone station \$138.64 up to Jan. 1, 1920; that the average plant cost at the end of this year, 1925, it is expected, will be computed as \$195.

Labor and Material Cost Asked by Mr. Sullivan to give the reason for the advance, Mr. Jones said it had been due to the increase costs of labor and materials. Later he said there had been no increase

has decreased slightly. Here is the explanation of the cogfactors by the New England com

presenting one of the arguments for an increase in telephone rates, Matt B. Jones, president of the New England Telephone & Telegraph Company testified that the average investment per telephone in this company on Jan. 1, 1920, was \$138.64, and on Jan. 1, 1925, \$182.91.

Basis of Estimates In view of the fact that there has been no increase in labor costs since Jan. 1, 1920, and a slight decrease rather than an increase in cost of materials, it is necessary to appreciate what the phrase "average investment per telephone" means, in order to understand the effect of this statement.

It does not mean that a telephone installed on Jan. 1, 1930, cost \$138.64. The actual cost of a telephone installed on that date, with all its associated plant and equipment, was about twice that figure. What it does mean is that all the plant then in service, divided by the number of telephones then in service, gives an average investment of \$138.64. The average service "life" of plant is about 13 years. Therefore, in determining the plant investment as of Jan. 1, 1930, one would have to include plant built during the previous 15 years. It follows, therefore, that much of the plant then in service was built at pre-war prices of labor and materials.

and materials.

Another fact to be considered in this connection is that during the war period there was very little building or rebuilding of telephone plant. The Government needed for the said way to be said plant. The government head and war purposes wire, cable, switch-boards, and other telephone materials, and requisitioned their use for war purposes to the exclusion of purely domestic telephone require-

Reserve Plant Used

Reserve Plant Used

The demand for service during the war period, and immediately following, was met from reserve plant built at pre-war prices, and not from plant built during or immediately following the war. In fact, up to 1920 practically all the plant in use had been built prior to our entrance into the war, and at the comparatively low costs for labor and material then prevailing.

In the year 1920, Mr. Jones testified, this reserve plant was entirely used up in meeting the demand for service. The demand continued, however, in greater volume than in any previous comparable period in the history of the telephone company. In order to meet it, the telephone company had to build large amounts of new plant. It also had to replace considerable old plant, built many years before. All this new plant and reconstructed plant cost practically double what the old plant did. Hence, it tended to increase the average investment per telephone. This was due to the increase the average investment per telephone. This was due to the in-creased cost of labor and materials, not merely since the year 1920, but beginning back before 1920 and con-tinuing to the present day.

must work out her own security in

(2) The minor ex-enemies are not

likely by themselves to cause serious trouble, since the lesser treaties are guaranteed by a superiority of force. The Treaty of Versailles possesses

France is afraid of Germany be-

She is Germany's neighbor. 2. She has within living memory been twice invaded by Germany. League of Nations

How far can the League be counted on to control a situation of such uncertainty? As a clearing house for international disputes the League of Nations is a wholly admirable institution. In many minor questions it has already played a most useful part, but at present and probably for years it will be unsafe to count upon its authority being sufficient to restrain a great power in any case in which that power considers its vital interests to be at stake. The time may come when the League will be able to deal not only incidental dispute with more permanent and deep-seated rivalries. It is vain to deny, however, that this stage has not yet been reached or to hide the fact that a sense of security cannot in such

vital matters today emanate from Geneva.

The following conclusions may be drawn from the above analysis: (1) The future development of Russia is still incalculable; Europe

end will provoke the German re-British Interests

In a situation of such uncertainty the only sound line of British policy is the path of British interests. The road is too dark for any altruism or digression; it is our own security which must remain the sole consideration. What then are the essentiate of the

which must remain the sole consideration. What then are the essential conditions of the security of the British Empire?

Before answering such a question it will be well to limit the scope of inquiry by the establishment of three axioms, namely:

1. That the policy known as isolation is not today a practicable policy. For America, powerful and aloof, such a course is still, perhaps, a possibility. For the British Empire no such escape is feasible, History and economics show that isolation in present conditions spells danger, vulnerability, and impotence. Geography and aeronautics show that isolation is not in our case a scientific fact.

(2) That conversely it would be unsound for the Governments of the empire to commit Great Britain and the dominions to responsibilities which are not direct necessities of imperial detense and of which the people of the empire could not approve. No promise must be given which public opinion in Great Britain and the dominions would not in the last resort be prepared to execute.

(3) If we are to contribute to general security we must establish first of all certainty and conviction. It is far better to give restricted promises which Europe realizes will be inevitably kept than to enter into wide commitments the ultimate execution of which would always allow of doubt. In order to carry such conviction we must base our policy not on possible tendencies but on generally recognizable facts; we must be direct, simple, explicit.

Imperial Defense

What, therefore, in their simplest expression are the needs of imperial defense? They may perhaps be summarized under three heads, namely: (1) The defense of the individual

(2) The defense of the sea com (2) The defense of the sea communications between Great Britain and the individual dominions.

(3) The defense of Great Britain itself, being the heart of the empire.

Nos. 1 and 2 are generally realized and are not for the present directly menaced. No. 3 is not perhaps so fully recognized as an imperial necessity and is a matter.

necessitates:
(1) That no single power shall be in a position to occupy or to dominate all the Channel and North Sea ports.
(2) That the hostility of France.

The defense of Great Britain

Belgium, and, more incidentally, the Netherlands, Germany and Denmark, who now possess these ports or of any combination of them, is to be avoided. (3) That no third power at war with France or Belgium should be allowed to invade those countries so as to threaten the status quo of the Channel ports or of such French or Belgian territory as would expose Great Britain to aerial invasion. Great Britain to aerial invasion.

(4) That it is consequently a necessity of British and, therefore, of imperial defense to reach some understanding with France and Belgium which may entail a guarantee

on our part that these territories shall not fall into other hands. COTTON MILLS STRIKE

Stephens, whose accent Robert Frost that can be said more shortly in described early in the Institute of prose than it can in poetry it is a Modern Literature as "rich and fas-cinating—how you'll enjoy it!" brought to Memorial Hall on Satur-brought to Memorial Hall on Satur-

which the trivia of life are transformed, changeling-wise, into singularly gay and amusing bits of etched glass which glow and flash or shine the charming hues of wit and humor the actualities of a pressing day. Mr. Stephens' lecture was known on the program as simply "Gaelic Literature." In anticipation, it promised a curious and exciting pligrimage into a world perhaps less casually explored by the ordinary literary wayfarer. In realization, it made an enchanting and tantalizing sojourn in a world where, if everything was not always gay and untroubled, at least it was almost inevitably burnished with dauntless optimism.

Mr. Stephens is a dark, little man, who trotted upon the platform on tip-

toe and who ceaselessly accompanied his lecture with a kind of tip-toed obbligate of motion. His face is luously on the ear in a sort of softly turbulent, tumultuous flow.

Evolution of Literature

Mr. Stephens began by tracing the evolution of modern literature, not put the roaring of all the oceans forgetting to remind his audience that, since Gaelic literature runs back, indeed, to the seventh century it is difficult to adequately discuss it it is difficult to adequately discuss it comprehensively in an evening, and he gathered he had best discuss modern Gaelic literature, which made it rather simpler. "I shall recite my own poems," said Mr. Stephen whimsically, little knowing how closely he was following in the comfortable decision of two, at least, who had preceded him at the Institute. "because for one reason I know tute, "because, for one reason I know them better than any other examples of Gaelic literature and, for another, I like them far better than

any others.
"In a number of poems which i conceive to be in the varied Irish mood I shall show you what I believe to be also the varying degrees of 'speed' which characterize that mood. I thought we had mountains in Ire-land until I came here. I think the pushed into your Lake Michigan and ot show. Nevertheless our mountains seem big, our plains wide, our lakes big. It is only figurative to speak of the speed of a mountain, because I have watched one from my window, between a might and a appreciably, so we certainly cannot say 'speed' in the customary sense. Nevertheless I read to you 'The Mountains,' the idea being that after I have given you it you must be as out of breath as if you had climbed it." It must be assumed from the original rost upon it." It must be assumed from the of a brilliant and original poet upon sounds made by the audience when Mr. Stephens had read the poem matters had been as he wished.

An Andible Gasp "It is ten times more difficult to describe the speed of a girl than it was the poem about one Peggy

day evening a tang and a lilt in poetry as unfamiliar to the larger part of the audience as they were refreshing and informative.

Mr. Stephens' world is a world in which the trivia of life are transformed, changeling-wise, into singularly and amusing hits of etched. ering vard which opened today in Cam-

larly gay and amusing bits of etched glass which glow and flash or shine with slumbrous beauty, and veil with the charming hues of wit and humor he recited a poem which he had made as he did because it could not pos-

NEW RECORDS FOR BUILDING

Contracts for 36 States for April Are Reported Largest in History

Building contracts in April for 36 Dorchester. A wrist watch was pre-states, representing about seven-sented to Mrs. Annie L. Woodman Building contracts in April for 36 eighths of the total construction vol- of Melrose, retiring president. ume of the United States, amounted to \$546,970,700, an increase of 14 per cent over March and 13 per cent over April, 1924, according to the review compiled by the F. D. Dodge Corporation. This is the largest monthly total on record.

The amount was divided as follows: \$256,414,300, or 47 per cent of all construction, for residential buildings; \$95,432,400, or 17 per cent, for public works and utilities; \$63,968,000, or 12 per cent, for commercial buildings; \$46,567,900, or 9 mercial buildings; \$46,567,900, or 9 per cent, for industrial buildings; and \$33,154,600, or 6 per cent, for

ducational buildings.
Construction started during the first four months of this year has amounted to \$1,623,540,000, compared with \$1,515,043,200 for the first four months of 1924-a gain of a little over 7 per cent. In addition to this gain in actual work started, there is also a big gain in work according to the Dodge survey. Contemplated new projects reported in April amounted to \$760,-657,600, an increase of 25 per cent over the amount reported in April

New England's building contracts increase of 14 per cent over March | continued: and 18 per cent over last April. Contemplated new work amounted to \$59,088,800, an increase of 52 per cent over April, 1924.

New York and northern New Jersey reported contracts for \$132,-032,000, an increase of 57 per cent over March and 22 per cent under April a year ago. Contemplated new work totaled \$167,788,800, a 2 per cent increase over April, 1924.

A drop of 8 per cent from March and an increase of 29 per cent over April, 1924, a total of \$59,795,100, is reported for eastern Pennsylvania, southern New Jersey, Maryland, Delaware, district of Columbia, and Virginia. This was a 46 per cent im-provement over April, 1924.

The Carolinas, Georgia, Florida, Tennessee, Alabama, Mississippi, Arkansas and Louisiana showed a 1 per cent increase over March and a 6 per cent decrease from April a year ago. The amount was \$50,813,-400. An improvement of 33 per cent in the outlook for new work was re-

Rhodes of Quincy, recording secretary; Mrs.

boro, Miss Mary D. Clare of Matta-pan and Mrs. Louise T. Perkins of

Georgetown, directors. The nominating committee elected comprises: Mrs. Eva C. Apted of Cambridge, Mrs. Mabel E. Sears of Roxbury, Mrs. Cora E. Darling of Hyde Park, Mrs. Helene Bishop of Allston and Mrs. Cora B. Glidden of

ANTI-SECTARIAN BILL IS ADVOCATED

Gov. Brewster Talks to Maine High School Principals

AUGUSTA, Me., May 11 (Special) -Gov. Ralph O. Brewster speak of the college, three other performing on the Maher amendment to the Constitution to prohibit the use of public funds for other than public purposes, before the conference of high school principals, said:

The advocacy of this amendment by people of all religious faiths is in itself a compensation for some sac-rifice of our individual views. Considering the question from this angle, we may feel the more in-clined to give it our united support and remove from the realm of controversy in our generation a ques tion that has very seriously agitated the people of almost every land."

He added that the amendment makes an exemption of the University of Maine from its provisions, and expressed the belief that the more completely the university is recognized as a child of the State the more in April amounted to \$39,774,100, an uses for which it was designed. He

The great bulwark of secondary The great bulwark of secondary education in Maine today is fur-nished by the high schools with 80 per cent of the pupils enrolled. These high schools receive stated grants of public funds in proportion to the service that they render and

the locality that they serve.

The number of academies is negligible compared with the number of high schools in our state. Five hundred towns and cities are interested in the equitable solution of the sectarian school problem in our state and intelligent consideration of their position will reveal inevitably the equity of the proposal that is

LOWER COURTS BACK DRUNKEN DRIVER LAW

The lower courts continued last week to carry out the law relative to drunken drivers charged with second offenses, three persons being convicted and all three receiving jail sentences, according to the weekly report issued by Frank A. All its monthly records for volume Goodwin, registrar of motor vehicles were surpassed in the central west, in Massachusetts. Two appealed and

sas, Oklahoma and Nebraska. The total was \$157,668,200. Contemplated work amounted to \$190,864,500, or an increase of 24 per cent over April, escape this punishment when their cases came up on appeal. Elaborate Production in Which Students Will Appear Will Be Feature of Semicentennial Celebration to Be Held This Month

One of the most elaborate pageants which Wellesley College has ever attempted will this year be produced in connection with its semicentennial celebration, May 28, 29 and 30. Written by Mrs. Christopher Pot-

ter, of New York, a member of the Wellesley class of 1907, and designed by Dugald Steward Walker, of New York, the pageant, entitled "The Winged Soul," has as its theme the quest of beauty through the ages. Additional to its production in con-nection with the fiftleth anniversary

MRS. CHRISTOPHER POTTER

will be open to the public. Rehearsals for the pagenat are already being held under the direc-tion of Mrs. Potter and Mr. Walker,

all parts being taken by the under-Pageant officials gave the follow

ing explanation of the play: The prologue states the theme, Standing in a Greek portico, the Philosopher speaks to his Disciple, telling him again of the high pilgrimage of the gods to the mountain tops, where Truth and Beauty and Wisdom are seen in their essence, of the aspiring souls of menwho strive to follow, of the few who succeed and attain the vision and who are subsequently born into the succeed and attain the vision and who are subsequently born into the world of men as philosophers and dreamers and poets and artists and discoverers, whose memory holds forever the beauty of the vision and who bring glimpses of that vision to all mankind.

The Beauty of the Arts The Beauty of the Arts

The first episode is devoted to the beauty of the arts. A bridge of dreams, supported by silver clouds, forms the setting first for a dance of waking dreams, and then for a vivid pageant of artisans: natives of Persia and Turkey bearing rugs. Japanese maidens with lengths of shimmering silk, like garlands looped from one to another; ancient Chinese carrying, one a rare porcelain, another a sphere of rock crystal, a third a lacquered chest.

The pageant passes. The curtainspart showing, in living reproduction, "Dante's Dream" as painted by Rossetti. Verses from the Vita Nuova are recited off stage.

re recited off stage This is followed by a scene in which Shakespeare, a young poet in the enchanted wood of Midsummer Night, is shown writing the immortal lines of Romeo and Juliet. As he writes, the wood scene fades and Juliet's balcony becomes visible in the moonlight.

Keats' Ode to a Grecian Urn is the subject of the next scene. Then comes in living reproduction "Wotan's Farewell to Brünhilde" by Dielitz, accompanied by the magic fire spell from Die Valkyrie.

The Beauty of Knowledge The second episode sets forth the Beauty of Knowledge. The discov-ery of the mariner's compass in an-

ery of the mariner's compass in ancient China; the use of geometry to orient the temples of the Egyptians; Galileo's demonstration of his "optic tube" to the Venetian senators; and Newton's analysis of light, are the subjects of the four scenes.

The third episode sets forth the Beauty and the Spirit. First a vast cathedral, dimly lighted, with knights in armor kneeling. It is the eve of the First Crusade and they have brought their banners to be blessed. The beauty of the medieval spiritual ideal at its best breathes in the scene. As the scene fades, there are barbaric trumpet calls and then to the strains of martial music passes a pageant of banners. The processional has double significance: to suggest the passing of The processional has double significance: to suggest the passing of years and at the same time the change in spiritual ideals. Thus, the first group of banners is that of the crusaders, among the number many bearing the Red Cross, symbol of militant Christianity. Follows a group bearing the devices of cities, great houses, and guilds of medieval

When the banners have passed the episode is brought to a climax by a representation of a great stained glass window, which typifies the spiritual ideal of modern times. The figures illustrate the text. "Inasmuch as ye have done it unto one of the least of these my brethren, ye have done it unto me," and beneath runs an illuminated scroll bearing the Wellesley motto: "Non Ministrari sed ministrare." Ministrari sed ministrare."

The epilogue brings the local application of the theme. Centering around a living reproduction of the Alice Freeman Palmer Memorial, it represents the sending forth of the college students on the high adventure, the quest of Beauty. Each bears in her hand the lamp, given as a sacred trust from alma mater, which burns, with all the beauty gathered from the past.

The curtain falls as the long line.

delinquent women.

Mr. Hodder is to go as a delegate and speaker to the International Prison Congress which is to meet in London, Eng., this year. She is to speak on the question, "Shall pris-oners be classified according to their character, the time of their commitment or the sentences imposed?" and on the organization and building plans of prisons to meet the demands of such classification.

Concentrating on Reformation Mrs. Hodder is working to eliminate the feeble-minded and men-tally unsound from prisons. They should be cared for in other institutions devoted to their particular needs, she believes, while the prison should be left free to concentrate on reformation of the criminal. Under the superintendency of Mrs. Hodder during the last 14 years the reformatory at Framingham has become known as one of the finest

institutions of its kind in the United States, if not in the world. Mrs. Hodder believes in discipline through expression, not through re-pression. She focuses on education believes in music, in a library and socal outcasts to respectable and trustworthy members of a lawabiding community, and these form an important part of the work caried on at Framingham.

MASSACHUSETTS CO-OPERATIVE BANK MILLIONS FOR HOMES

Loans Up to 80 Per cent of Property Value Allowed on Easy Terms to Help Home Owners and not a Dollar Ever Has Been Lost to a Shareholder

Co-operative banks which have this State, replying to a letter from proved their title to leadership in the lomeowning movement have reached movement, said: in safety and extent. Over a period of 48 years in this State not a single dollar has been lost to a shareholder of a co-operative bank. At the present time there are 217 such banks a chartered, with total assets of \$311,-

Co-operative banks and building and loan association in various forms are found all over the United States, their safety depending largely upon the nature of state banking laws regulating their organization.

Safety has been obtained in Massachusetts through strict state regulation which provides that only first nortgages may be taken on property PRIZES AWARDED in return for loans.

Small Monthly Payments

A co-operative bank loan is at-tractive to the Massachusetts borrower because he can borrow up to 80 per cent of the value of his prop erty-the limit being \$8000-and the

"This feature is of greatest importance to the average home buyer." gage and as long as the monthly payment is regularly met, he may make partial payments on account of the the total loan whenever he so de-

The money to make these loans comes from investors attracted by the plan for systematic saving combined with safety and reasonably high interest return. A co-operative bank share, par value \$200, may be monthly deposits of \$1-the "regularity" being encouraged by a fine of 2 cents for tardy payment—until with the accrued compound interest the sum amounts to \$200. The interest rate ranges from 5 to 6 per cent. Thus the investor who puts \$10 a month into a co-operative bank offering 5 per cent will at the end of 12 1-6 years have actually paid in cash \$1460 and in return receive \$2000. One person 's limited to 40 shares in one bank.

Liberal Interest Return

The comparatively high interest re turn on a co-operative bank investment is made possible by the cooperative nature of the organization whereby profits from loans are divided equally between all shareholders. And, in Massachusetts at least, almost every cent of gross profit is thus divided, the ratio of total expenses to total assets of

Otis Mansion Will Form Center for Museums of Antiquities

New England Society Launches Comprehensive Program for Acquisitions to Its Collections Illustrative of the Activities of Early Settlers

What shall ultimately comprise a New England museum of the beginnings of the everyday life of the American people, of the same general scope as the great folk museums of Europe, their houses, their furniture, household decorations, and utensils, the clothing worn, the tools used, everything, in fact, needed to preserve a complete recora of those early times, has been planned by the Society for the Preservation of New England Antiquities, and is now in the first stages of actual operation. With the decision to expand the Harrison Gray Otis house at the cornor of Lynde and Cambridge streets, in the West End, Boston, an important step has been taken in the fulfillment of this project and in establishing in Boston a definitely organized museum center of a character new to the United Stafes and probably not surpassed in any country.

The Old State House, Fancull Hall.

The Old State House, Faneuil Hall, the Paul Revers House and the Old South Meeting House, now used as museums, while belonging to other organizations, and other historic buildings such as the Old North Church, Kings' Chapel, Copps Hill Burying Ground and similar places surveying from the early days of American history, form a naturally related setting to such a museum and a practical, if not an actually organized, part of it.

other parts of Massachusetts, in New other parts of Massachusetts, in New Hampshire, Rhode Island, and Connecticut, and others to be acquired in Maine and Vermont, each of which is to be made an integral part of the complete plan, the museum will be sectional rather than local, New England rather than Boston or Massachusetta, and in its visualization of American life will be national in its appeal. The many members of

ment of a committee able to give sufficient time and attention to look after the organization, scattered over the entire United States, are expected to co-operate actively in the development of the idea.

Plans adopted at the annual meeting of the society held a few days ago, provide that the Otis mansion center shall continue to be both the administrative headquarters as now, and the headquarters of the museum as a whole. The mansion is to be furnished in whole or in part in the style of its own period of about 1785, thus presenting the type of house occupied by the American gentleman of that time, Harrison Gray Otis being statesman and orator of distinction. A hall in the basement will provide for meetings and special loan exhibits.

Library and Collections

else to make the necessary purchase and special loan exhibits.

Library and Collections

Two houses on Lynde Street, directly back of the Otis House, to be acquired by the society, will furnish space for general museum purposes of antiquarian interest located in various parts of New England. Most of installed the society's library, including its special collection of New England views. A good judge has ventured to say that in his opinion the most valuable work the society has been doing is the collection of the Boston Athenæum, is pressident of the association; Hollis franctically every New England view which if can acquire. It is doubtful if there is anywhere else a collection of New England views comparable to it. Its collection of William C. Endicott of Danvers, and the presentation of Boston, recording secretary and parable to it. Its collection of william Sumner Appleton of Boston, recording secretary and parable to it. Its collection of william Sumner Appleton of Boston, recording secretary and parable to it. Its collection of william Sumner Appleton of Boston, recording secretary and collections of which it can be necessary purchase and special loan exhibits.

A Girl Scout chorus of 1000 voices, the part of individual leaders of the Unitarian movement as well as the preservation in 1910 it has been responsible for the preservation in the part of individual leaders of the Unitarian movement as well as the preservation in the part of individual leaders of the Unitarian movement as well as the preservation as a whole, and discussion of a resolution which condemns the Versailles treaty, calls "for the various parts of New England. Most of a resolution which condemns the Versailles treaty, calls "for the various parts of New England interest located in various parts of New England will as the preservation of a resolution which condemns the Versailles treaty, calls "for the unitarian movement as well as the preservation of a resolution which condemns the Versailles treaty, calls "for the unitarian movement as measured drawings of buildings corresponding secretary.

The society possesses a valuable collection of the cruder farming implements used in the early days of the colonies. The largest part of the collection is from the old Perkins farm in Lynnfield. It is a truly remarkable collection, admirably adapted to visualize the simple country life of the Puritans and well worthy of being made permanently accessible to study. These with much of the smaller and more fragile material may be taken out of storage and transferred to the Browne house center.

In addition to these two the so-

Burying Ground and similar places surveying from the early days of American history, form a naturally related setting to such a museum and a practical, if not an actually organized, part of it.

Not a Lecal Plan

With old houses and other buildings now owned by the society in other parts of Manachusetts in the purposes.

Browne house center.

In addition to these two the society has greatly improved two of its other properties during the last year, the Eleazer Arnold house at Lincoln, R. I., built about 1887, the Jackson houses at Portsmouth, N. H., and the Quincy Memorial house at Litchfield, Conn., a modern house with endowment for antiquarian purposes.

Development of the "Scotch"Boardman house at Saugus, Mass., built in 1651; the Samuel Fowler house in Danvers, built in 1809; the Jackson and Arnold houses and the Browne house barn await the employment of a curator or the appointment of a committee able to give sufficient time and attention to look after the details of administration.

In addition to these houses the Curators Are Needed

ection of William Sumner Appleton of

Flower-of-the-Field Goes to Peking

their work in the fields and a little before it was time to light the lanterns. Flower-of-the-Field went out into the yard surrounding her father's house. Her heart was very heavy for she had been listening to the conversation of her grandmother and a neighbor. From what they said she could understand that if her mother had only had a son she too might now be looking forward to the same joyful experience as their next-same joyful experience as their next-friend, 'before I went to school I felt

leave what they were doing and useful to her mother and father and to her country as a man."

"Flower-of-the-Field dragged one" "After this young Mrs. Li talked

turned it up on end and managed by Chia-keng and his wife returned

standing on tiptoe to peep over into the roadway.

"An automobile had pulled up outside Farmer Li's house and a strange-looking gentleman was helping an equally strange-looking lady to get out. Flower-of-the-Field felt sure that this must be Li Chia-keng and his wife, the young lady from Peking. To the little Chinese girl, who had never been more than a mile or so away from home, and was used only to seeing the long blue.

Peking a small passenger sat on the back seat of the automobile.

"As I watched her going away." concluded Uncle Norman, "Flowers of-the-Field's face wore its usual unruffled expression. When I saw her later in Peking, however, she told me that her heart was singing with happiness every mile of the way."

"Say It With Flowers" used only to seeing the long blue smocks of the countrymen, Chia-keng's Western clothes made him appear like a foreigner. When, however, young Mrs. Li slipped off her long traveling coat she was dressed in the familiar Chinese garments, though her hair and shoes looked

different.

set to go and speak to the newcomers but before many days were over Mrs. Li brought her daughter-inlaw to visit Mrs. Cheng.

"The little girl listened to all the interesting things that young Mrs. Li had to tell them; about the busy streets of Peking and the big shops and the trolley cars. She told them that many people dressed in the that many people dressed in the Western way, and that highborn

NE evening, just as the farm- ladies no longer thought it undigers were returning from nified to walk. But the best thing of their work in the fields and all was that there were many schools

same joyful experience as their next-door neighbor, Mrs. Li, whose son, friend, 'before I went to school I felt Li Chia-keng, was about to visit his home after a long absence.

"Presently the unusual honk-honk But now I know that it does not bile made everyone matter, for a woman can be just as

of the large baskets lying around in much to Farmer and Mrs. Ll, and the yard to the side of the wall. She the end of it all was that when Li standing on tiptoe to peep over into Peking a small passenger sat on the back seat of the automobile.

In outlining his platform he says: In the independent character of an American citizen, and in the nonpartisan spirt of our flag and in-stitutions I shall be a candidate for United States Senator at the next election, and in that character and spirit shall crusade.

For more co-operation for peace, and less competitive arming for war, and for a law, that in the event of war, censcription shall not be of war, censcription shall not be limited to the youth of the Nation—to fight and die—as in the last war, but shall extend to every industry and bank account, because I believe with The Christian Science Monitor and General Edwards, commander of the Yankee Division, that with such a law "there won't be any war," and because I believe with Henry Ford, that, until the soldier makes money by fighting, until mothers make money by giving their sons to war, not until them should any citizen make money out should any citizen make money out of providing his country with the means of preserving its life.

BESPEAKS TRUTH ABOUT AMERICAS

Dr. Shepherd Says Press Should Spread Knowledge of New World Nations

Special from Monitor Bureau NEW YORK, May 9-Dr. William R. Shepherd, professor of history in Columbia University, in an address in McMillin Theater on "Fourteen Points in Friendship Between the Americas," advocated the conversion by reciprocal agreement of the true Monroe Doctrine into a self-denying ordinance for the Americas at large. Hispanic America, the speaker de clared, is a field of limitless value to the United States. Newspapers and publicists would be doing the American people a real public serv-

"Among our young men, more especially, the future statesmen and captains of industry." Dr. Shepherd

WILD FLOWERS' SAVING SOUGHT

Brooklyn Botanic Garden Backs Bill Proposed in New York Legislature

Special from Monitor Bureau NEW YORK, May 11—The state-wide movement for legislation for the preservation of native American wild flowers is receiving active support from the Brooklyn Botanic Garden, says Dr. C. Stuart Gager, director, in the fourteenth annual report of the Brooklyn Botanic Garden for the year 1924.

An amendment to the conservation law of New York State was introduced in the State Legislature in March, 1924. By its terms native was riding alone across the plants were to be recognized as de-great plains of western Texas. At that time the ranch houses were same basis as that which now applies ice, he said, by spreading accurate many miles apart and there were very to wild animals. This amendment, knowledge of the Central and South
few roads or fences. The boy ran out
which represented the proposal of the
American republics.

which represented the proposal of the
joint committee appointed by four societies, the Wild Flower Preservation Society, the American Fern Society, the New York Bird and Tree Club, and the Torrey Botanical Club, was passed by the State Senate but failed in the Assembly in the rush of the last days of the session.

The committee is continuing its activities under the charimanship of Dr. G. Clyde Fisher of the Amertanic Garden

The grounds are being developed each year and the garden is known as one of the most beautiful spots in New York City. In the fall of 1924 about 28,000 bulbs were planted in addition to the 47,000 planted in the fall of 1923, and when these came into bloom this spring they attracted hundreds of visitors who had not previously been acquainted with the attractiveness of the garden.

One of its activities is the International Seed Exchange, by means of which over 4600 packets of seeds of nearly 900 species were sent to for-eign gardens during 1924. Of the total budget of the Brooklyn Botanic Garden for 1924, nearly 39 per cent was provided from private funds. It was visited during the year by more than 438,000 persons

during the coming summer is planned by a committee representing the Town Improvement Association, which has been active during the past week setting out trees in various sections of the town.

NEWARK, N. J., May 11—Newark beat Philadelphia 4 to 0, in an American Society League game played here Saturday. At half time the Jerseyites led. to 0, the goal being made by Heminsley. After the interval Newark had much the better of the play.

Montclair, N. J. Special Correspondence RT lovers, in number far exceeding the capacity of the building, gathered at the Montclair Art Museum on May 3 to commemorate the centenary of George Inness' birth, and to pay homage with fitting tribute to the genius of this American landscape artist. It May 12 and 15. The cast:

this American landscape artist. It was in the studio on Grove Street, Montclair, that Inness spent 16 years, the most productive as well as the final period in which his genius reached its most transcendant phase. The north gallery of the museum, which has been recently enlarged, through the generosity of Mrs. Henry Lang, by Messrs. Goodwillie & Moran, architects, was filed, and a large number of late arrivals were forced to be content with standing room in the sculpture hall when the ceremony was opened by the museum president, F. Layton Brewer, who pointed out Montclair's claim to Inness, and presented Edward H. to Inness, and presented Edward H. Blashfield, president of the National Academy, who, in introducing the topic in the afternoon, lauded Inness' career and dwelt on the debt modern landscape art owes to him.

Inness' Development

These remarks were followed by a solo by John F. Carlson, N. A. An address on "George Inness, the Artist A. McCormick, author and writer, as a grocer in Newark, into which that sitting behind his counter, unmindful good it seems only fair to state that of the rapping of customers. He was saved from that career. Permitted to Tom Brown, Paul Jacchia, William follow his bent, he entered into his Quinn, Virginia MacNaughton, James

his manner, and told how he was in- Victor Sigler. Game of Hunt the Ball of Twine Ends in Yucatan Discovery

Chicago Can Produce 110,000 Tons of Binder Twine a Year, Enough to Harvest Seventy-Three Million Acres of Grain

A BALL of twine, hidden away on the inside of a great harvesting machine, is certainly an inconspicuous thing, and few would realize, who are not themselves makers of users of agricultural machinery, that on the uniform size and tensile strength of that twine depends the smooth operation of the harvester, and hence, ultimately, in a great degree, the bread supply of the world. The binding attachment, added to the reaper, transformed it into a "harvester" in the fullest sense, and the humble twine, which superseded wire in the binding of grain, may be said to be the crowning adjunct of that greatest of labor-saving inventions, the harvester, as it is known today, it is pressed inside a pulpy substance through which runs the all-important fiber from which twine is made. The fiber which comes from the decorticating machine. This machine, as its name implies, takes off the hard cortex of the leaves, and the hard cortex of the leaves, and the wine, which twine is made. The fiber which comes from the decorticating machine. This machine, as its name implies, takes off the hard cortex of the leaves, and the vine is made. The fiber which comes from the decorticating machine. This machine, as its name implies, takes off the hard cortex of the leaves, and the vine is made. The fiber which comes from the decorticating machine. This machine, as its name implies, takes off the hard cortex of the leaves, and the vine, which twine is made. The fiber which comes from the decortex of the leaves, and the hard cortex of the leaves, and the subject to the division of the hard cortex of the leaves, and the hard cortex of the leaves, and the subject to the smooth operation of the harvester, and hence, uitimately, in a great degree, the bread supply of the world. The binding attachment, added to the reaper, transformed it into a "harvester" in the fullest sense, and the humble twine, which superseded wire in the binding of grain, may be said to be the crowning adjunct of that greatest of labor-saving inventions, the harvester, as it is known today. If no harvesting machines were manufactured for a whole year, the farming community would, undoubtedly, be put to some inconvenience, but would manage to get along with no serious loss. On the other hand, if the supply of twine for one harvest were suddenly to be cut off, it would mean not simply a national, but an international, calamity, as it would be impossible to obtain help enough to gather the crops.

The hunt for the ball of twine that

of \$50,000,000 in the last 40 years was at stake.

One of the men kept awake at night by these problems was William Deering, whose harvester was interested in twine. By chance one day he untwisted a manila rope, and the thought flashed upon him that manila would make good twine if the strands could be spun small enough. The problem was laid before one of the biggest rope manufacturers in the country, and promptly turned down. Another manufacturer of ropes thought he could do it, only his machines made but 300 feet to the pound, whereas it was necessary to have it 700 feet to the pound. The machines were rebuilt, however, and the desired

Yucatan solved the last step of the problem. A plant of the agave tribe, known to us only as a foliage plant, can be grown in great abundance in a small section just above sea-levelalmost a solid ledge of limestone rock. It yields a fiber known as sisal, and today sisal produces from 85 to 40 per cent of the binder twine used throughout the world. The plant is known in Yucatan as henequen.

The henequen plant looks something like a century plant, with a low the fiber-combing machine pulls it out to a greater length.

This pulling or drawing out of the fiber combing machine pulls it out to a greater length.

This pulling or drawing out of the fiber is accomplished not by stretching it with reclaim to the saction of the fiber is accomplished not by stretching it with reclaim to the saction of the fiber is accomplished not by stretching it with reclaim to the saction of the fiber is accomplished not by stretching it with reclaim to the saction of the fiber is accomplished not by stretching it with reclaim to the saction of the fiber is accomplished not by stretching it with reclaim to the saction of the fiber is accomplished not by stretching it with reclaim to the saction of the fiber is accomplished not by stretching it with reclaim to the saction of the fiber is accomplished not by stretching it with reclaim to the saction of the fiber is accomplished not by stretching it with reclaim to the saction of the fiber is accomplished not by stretching it with reclaim to the saction of the fiber is accomplished with a little begins to make its appearance, get it makes is finished with a little string larger and more square-shouldered every second. When it has produced every second. When it has string larger and more square-shouldered every second. When it has string larger and more square-shouldered every second. When it has produced every second. When it has string larger and more square-shouldered every second. When it has only all the operations which have been suddenly the machine stops of its out to a greater len

throughout the world. The plant is known in Yucatan as henequen.

The henequen plant looks something like a century plant, with a low core, and stiff pulp leaves standing up around it, considerably higher than a man's head when it reaches maturity, which takes about seven years. A plant yields from 12 to 20 leaves which the natives cut with sickle-shaped knives from the machine into revolving cans at the sickle-shaped knives from the machine into revolving cans at the sickle-shaped knives from the machine into revolving cans at the sickle-shaped knives from the machine into revolving cans at the sindle "sliver" by the workmen. When at last the "finishing machine" spouts out its contents, one can tell the bundle, and operating in just the wight relation to the nature of the finishing machine.

In the factories where binder twine is made one may witness on a trial platform similar to that of the harvester, a bundle of grain bound just as it is done in the field. What one sees is a big sickle-shaped needle coming up and around the bundle of loose grain, compressing it, and at the same time putting a line of twine about it. Underneath the bundle, and operating in just the wight relation to the machine.

In the factories where binder twine is made one may witness on a trial platform similar to that of the harvester, a bundle of grain bound one sees is a big sickle-shaped needle coming up and around the bundle of loose grain, compressing it, and at the same time putting a line of twine about it. Underneath the bundle, and operating in just the wine is made one may witness on a trial platform similar to that of the harvester, a bundle of grain bound one sees is a big sickle-shaped one sees is a big sickl year around. The leaves average a little less than two pounds in weight. Usually from 3 to 3½ per cent of marketable fiber, or about one ounce, is obtained from an average leaf, making an average perhaps of one pound from each plant, or 1000 pounds an acre. This is the result of a year's operations.

When at last the "finishing machine" spouts out its contents, one can tell by taking up one of the ribbons of "sliver" that it has diminished in thickness to almost the feeling of a piece of thick string, and this is the point at which it is ready for spinning into twine.

Spinning the "finishing machine" spouts out its contents, one can tell by taking up one of the ribbons of "sliver" that it has diminished in thickness to almost the feeling of a piece of thick string, and this is the point at which it is ready for spinning into twine.

international, calsmity, as it would be impossible to obtain help enough to gather the crops.

The hunt for the ball of twine that would work in the harrester was a long one. One manufacturer tried to make twine out of grass, it cost this six six out that it would not work. Then he tried to make a paper twine, and spent \$25,000 before he gave it up. Next he tried straw as a raw mategial—and the attempt cost him an additional \$43,000.

Manils and Sisal

Eventually the problem was solved by two foreign fibers—manils and sisal—but another company still thought they could find a home product. Home-grown fax seemed to fill all requirements, and the company spent \$1,000,000 in perfecting the process of turning it into twine. Then, when it was carried into the field and tied around the bundles of grain, it was discovered that crickets and grasshoppers like mothing quite so well. These two insects promptly ate the twine and the bundles fell to pieces out in the fields. An industry has has grown to the grand total of \$50,000,000.000 in the last 40 years was at stake.

One of the men kept awake at anlight by these problems was way.

tion with the fiber is apparent to chine. Each bobbin is weighed, and the pound. The machines were tion with the fiber is apparent to chine. Each bobbin is weighed, and the eye of the most uninitiated, for then a whole truck load of bobbins It was soon discovered, however, that while the manila fiber makes a beautiful twine, the expense was too great a handicap, so far as cheap twine for use in the wheat field was concerned. So it became necessary to look about for a more economical fiber.

The was soon discovered, however, that while the manila fiber makes a beautiful twine, the expense was too great a handicap, so far as cheap twine for use in the wheat field was concerned. So it became necessary to look about for a more economical fiber.

The machine look like many young women are at work, each placing a bobbin on a steel rod of a machine, and wrapping one end of the twine around another steel rod between combing fiber for twine and combing one's head is that in additionally the separating it into parallel twine as it completes the two fingers and the thumb of which the twine is taken to a balling room. Here many young women are at work, each placing a bobbin on a steel rod of a machine, and wrapping one end of the twine around another steel rod beneath it. Then a busy apparation of the twine as it completes the two fingers and the thumb of which the twine is taken and tied into a knot. Harvesting Henequen

EDUCATIONAL

Approaching Educational Statesmanship

wealth, which naturally begets aris-tocracy and discourages democracy, the impersonal character of much of dern ownership, and absentee

ownership, and absentee ownership, lend especial acuteness.

Absentee ownership, whether of land or of other capital goods, has ever been productive of parsimony and hostility in all countries toward the upbuilding of community institutions by taxation. Few realize the extent of nonresident ownership of the natural resources, industry, credit facilities, and newspapers. Does this impersonal economic absenteeism ever actively favor our public school and its ideals? Such concentration of ownership and operation means immense, almost overning, concentration of powerpolitical, educational, and social, as well as economic—in the hands of the few men who head and manipulate it. The attitude of men of such power toward public education and toward rule by all of the people is of enormous consequence. To expect their attitude to be wholly favorable is to expect a great deal of human nature, especially when its education has been of a kind to stimulate ac-

quisitiveness and power lust rather than service and humility.

Rich men of the type of Thomas Jefferson and Governor Sweet are rare. Many persons who have come into possession of power rivaling that of political monarchs, without the character, intelligence and social training to fit them for the wise exercise of such kingly trusteeship, are either ignorantly indifferent or ignorantly inclined to a policy of rule or ruin with reference to educa-tion. Of course, rule by them or by any class, even the wisest, means ruin. Plutocratic dictatorship is no less hateful than proletarian dicta-torship. In the face of this challenge citizen teachers, here and there, desire to so live and teach, in school and out, that their states may be efficiently self-governed and never surrendered to exploitation as estates. This being the situation, must we conclude that it is a fight to the finish between the public schools, and what they stand for, on one side, it signifies, on the other side?

Not Reassuring The situation in the Nation as a whole cannot be said to be reassuring with respect to possible recon-ciliation of these conflicting points of teurs for whetting their geometric view in the near future. Private schools for the rich are becoming a their lack of knowledge, for as with public's colleges as meet with the others, is an unorthodox method. approbation of this private founda-

to destroy the corporation and trust, of mathematics." and good government require an expanding and improving public school, rather than a restricted and devitalto substitute in the minds and habits of the rising generation a more cooperative basis for international, interoccupational, interchurch and interracial relations.

A Necessary Condition

That militarist and pacifist, aristocrat and democrated the course of study. That militarist and pacifist, aristocrat and democrated the course of study. That militarist and pacifist, aristocrat and democrated the course of study. That militarist and pacifist, aristocrat and democrated the course of study. That militarist and pacifist, aristocrat and democrated the course of study. The first pacific pacific pacific pacific pacific There has been enough of dismissal and the show-me historians, the evolutionists and devolutionists—that all opinion. There will be more. Progress is made through personal sacrifice. But no teacher who lays his official head upon the block rather than fail to bear witness for science, is an open than fail to bear witness for science, is an open than fail to bear witness for science, is an open that all opinions that all are jostling one another to get the actual and potential power of the leachers, the multipation of departments of education in the colleges and increased participation of teachers in public affairs a new outlook and new method in the school have come about. Apparently teachers are beginning to sense rather vividly what schools are for, namely, the upkeep and improvement

of society.

Progress toward educational statesmanship calls for: 1. More participation of teachers in public affairs. 2. More freedom of opinion and speec for teachers on all questions. These two factors we have just discussed.

3. More freedom and self-responsi-bility for pupils, under guidance that stresses thorough investigation good will, and accuracy and tentasible, trained in the technique of iveness in conclusions.

> While teachers have been struggling to make school advantages available on more nearly equal terms everywhere, and while they have been insisting on full citizenship and freedom of opinion for themselves they have been endeavoring to assure more freedom within the sch pupils: They perceive that the child's integrity of mind must be respected. He must not be subjected to ruthless indoctrination nor unintelligent discipline. In so far as a teacher would not be slave just so far will he not be master. Democracy is a govern-ment by law not by persons. To be effective, law must be the consensus of the group, homemade, so to speak. Both liberty and law are essential to work and growth, and are mu-

Even comfort-loving administra-tion is no longer satisfied with mass manipulation of pupils. A revolt against the lockstep, excessive regimentation, and the extinguishing blur of uniformity is in full swing, with every prospect that it will not cease, until there is at least as much facility of adjustment to individual differences in the school as there is outside of the school.

Dickens in His Friendships

HE noble collection of Charles perhaps, but not jealousy.

Dickens' letters (quite as fasci- was not one of Dickens's nating in its way as any of the novels) might well be supplemented by a collection of letters to and about the great writer. Many a kindly fortunate misunderstanding based upon the unmannerly behavior of an obscure London journalist, and before the end those two good and great men words of Hans Christian Andersen, had once again joined hands and written after Dickens had bade him hearts. farewell: "We pressed each other's hands, and he looked at me so kindly with his shrewd, sympathetic eyes, and as the ship went off. there he stood waving his hat and looking so gallant, so youthful and so handsome." And there, too, the considered opinion of Henry Morley, at the time "a sort of deputy sub-editor of immense use." It was in 1851 that Morley wrote: "Mr. Dicksens is the kindest and most honorable of men; and in whatayer you do

to this kind friend who so often cheered so many hours, brought pleasure and sweet laughter to so many homes, made such multitudes of children happy, endowed us with such a sweet store of gracious thoughts, fair fancies, soft sympa-thies, hearty enjoyments." Rivalry,

The hermit thrush! of reverence and enthusiasm for the stately and turbulent "old man eloens is the kindest and most honorable of men; and in whatever you do for him you will be able to reckon steadfastly on his earnest acknowledgment and liberal desire to make it more and more worth your doing."

Among the men of his own age who loved and admired him, the most familiar name is that of John Forster. He is semembered toda; principally as "Dickens's Boswell"; but he was a greater man than Boswell. He himself would not object to standing chiefly to posterity as the biographer of his friend, but, as a matter of fact, he represented much more than that. He was a keen critic, a capable editor, and the author of excellent monographs. To Dickens he was an elder brother. Trusty, stanch and reliable, he helped the novelist at every turn with criticism and advice. Theirs was an unbroken friendship of thirty-four years; they never failed each other.

The famour stilled man bost honoradguent." Landor wrote to Forster in 1839, "Tell him he has already drawn from me more tears and more smiles than are remaining to me for all the rest of the world." The picture which Dickens gives of Landor as Lawrence Boythorn in "Bleak House" is really a transcript drawn with a most affectionate hand. What Landor actionate hand. Landor wrote to Forster in 1839, "Tell him he has already drawn

The famous artists, Daniel Maclise and Clarkson Stanfield, were very lose to Dickens in the early days, tanfield—"noble old Stanny," as jockens called him—R. A. though he as, painted for his friend some very elightful scenery for "the smallest leatre in the world," which Dickens and constructed in his own house. delightful scenery for "the smallest theatre in the world," which Dickens had constructed in his own house. Maclise painted the most famous of the earlier portraits of Dickens; it was used as a frontispiece to "Nicholas Nickleby." "As a likeness," said Thackeray, "it is perfectly amazing; a looking-glass could not render a better fac-simile."

The friendship between Thackeray and Dickens possesses features of peculiar interest, because of the inevitable rivalry between these writers of the same times and yet so widely dissimilar in the quality of their genius. It was a genuine friendship; for twenty years Thackeray was a welcome guest at Dickens's house, and Thackeray's kindly references to the latter are a commonplace of literary history. "We have reason," he said in one of his lectures, "to be thankful to this kind friend who so often cheered so many hours, brought pleasure and sweet laughter to so simultaneously at the time, the advice was sound.

On both of his American journeys,

pleasant reference to Irving—whose insistence, indeed, had led to his making the trip: "Washington Irving! Why, gentlemen, I don't go upstairs to bed two nights of the seven without taking Washington Irving under my arm. . . . Washingto Irving — Diedrich Knickerbocker Washington

With Longfellow he found much in hospitably to receive you. I am ready

Dickens numbered many actors among his friends. Chief of them all was William Charles Macready. His diary has this entry in 1837: "Forster came into my room with a gentle-man whom he introduced as Dickens, alias Boz. I was glad to see him." Later there are entries like these:
"Wonderful Dickens!" "He is a
great genius." "Purchased two last ers of Copperfield, and read parts of each. Was very much world for interest, variety, and color, affected and very much pleased with It is like viewing a motion-picture of them. His genius is very great." Very life in the Orient of the Middle Ages, touching and beautiful is the account like strolling through the streets of of Dickens's kindness to Macready. "Dickens was his most frequent visitor. He cheered him with narratives of bygone days; he poured some of his own abundant warmth into his heart; he led him into new channels of thought; he gave readings to arouse his interest; he conjured back his smile and his laugh.

arose between the two which ripened into a deep affection. Three at east of the novelist's books show Carlyle's influence—"A Tale of Two Cities," "Hard Times," and "Great While morning woke in the moun-

"It is almost thirty-two years since I heard the hermit thrush my acquaintance with him began; and on my side, I may say, every new meeting ripened it into more and more clear discernment of his rare and great worth as a brother man: a most cordial, sincere, quietly decisive, just and loving man; till at length he had grown to such a recognition with me as I have rarely had for any man or my time."

I heard the hermit thrush Send in the list silver song
Trembling through the air, Like water in the hill cascade, Leaping and churning
And full of bubbled notes.

Out of the morning
That coppered the peaks
And drove the chill from the air, I stood by the birches

The sacred earth in her delight

On both of his American journeys, Dickens exerted the same fascination as at home. James T. Fields speaks of that first apparition of his handsome glowing face and sparkling blue eyes, as if he was "the Emperor of wit looking for new realms to conquer." On his first visit the warmest friends were Irving, Long-fellow and Professor Felton of Harvard. "Hose of the townstolk, wand fare an endless file of camels slowly make their supercillous way, guided by differed faced, wild-haired Somalism from the constitute."

I enjoyed at Hurstpierpoint, from the toollege, a sign has hand their supercillous way, guided synder exercity was of distriction; but little is heard of its orginal settlement as a fisher-village.

A few centuries after the "great dra-migration" a Wendic tribe conquered this section of the country and its section of t fellow and Professor Felton of Harvard, "heartiest of Greek professors."

Speaking at the great dinner in New
York on this visit, Dickens made
pleasant reference to Irving—whose

MOTOR STOCKS FEATURE OF A BROAD MARKET

Easy Money and Firm Foreign Exchange Rates Help Sentiment

Responding to the assurances of bankers and Government officials that business conditions were fundamen-tally sound, stock prices started up-ward today for the eighth consecutive

ward today for the eighth consecutive session.

U. S. Realty crossed 147 and Pierce Arrow common sold above 19, both at new high prices for the year, while initial gains of a point or more were recorded by Dodge Brothers preferred. Associated Dry Goods and Central Leather preferred.

Renewal of bullish demonstrations in the motor issues in further reflection of the unusually heavy spring sales of several makes of cars was one of the features.

Willys Overland common was bid up 3 points to above 24, a new 1925 peak price, in the first half hour on total sales in excess of 50,000 shares, and Pierce Arrow preferred recorded a similar gain by touching par. Hudson, Chandler and Stromberg Carburetor also were in good demand.

Easy money rates and a firm foreign exchange market had a cheerful effect on speculative sentiment. Leather stocks responded to reports of improvement in that industry.

Buying orders were distributed over a wide list, testifying to the increase in public participation.

Some Stocks React

Steel shares were heavy on selling inspired by the decrease of more than 400,000 tons in the unfilled orders of the United States Steel Corporation, which were made public at the close on Saturday.

which were made public at the close on Saturday.

Equipments failed to respond to the recent placing of some large railroad orders, including one for 6500 freight cars by the St. Paul Railroad. Reactionary tendencies also crept into some of the rails as a result of the differences developing among eastern railroad executives over consolidation plans, although shares of the southern carriers improved in reflection of the growing prosperity of their territories. Extensive switching from the high priced motors to the low priced shares in which pools were active probably accounted for the weakness of Mack Truck which sold down more than 3 points before noon.

Stiffening of crude rubber prices accounted for the further accumulation of tire stocks, Kelly Springfield and U.S. Rubber Co. mounting to new high levels for the year.

Call money renewed at 3½ per cent. The demand for low priced motors was given fresh impetus by the establishment of a new high record by Studebaker at 47, but the terrific pace of general trading with which the session started was not maintained.

session started was not main-

French Bonds Higher

Entrenched firmly in the highest ground reached this year, the bond market today continued to make orderly progress. The trading was featured by a moderate upward movement of French Republic, municipal and railroad obligations, which responded to reports that France soon would undertake a settlement of its debt to the United States.

Gains of a point or so were recorded by the active issues before noon. Rising rubber prices stimulated trading in the tire company liens, with U. S. Rubber and Kelly Springfield issues leading the advance.

Rubber and Keny Springleton leading the advance.
Profit-taking made further inroads into the railroad list, causing moderate recessions in 'Frisco, Seaboard, Atchison and Chicago Great Western mortgages. Oil bonds also drifted irregulations.

NEW ISSUE

\$10,000,000 Philadelphia Suburban Water Company

First Mortgage Gold Bonds

5% Series due 1955

Due May 1, 1955

Dated May 1, 1925

Interest payable May 1 and November 1. Redeemable as a whole or in part and for the sinking fund on any interest date on not less than 30 days' notice at 105 on or before May 1, 1935; thereafter at 102½ on or before May 1, 1945; thereafter at 101 on or before May 1, 1954; thereafter at par to maturity; in each case with accrued interest.

Coupon bonds in denominations of \$1,000 and \$500 registerable as to principal.

The Pennsylvania Company for Insurances on Lives and Granting Annuities Philadelphia, Trustee

The Company will agree to pay interest without deduction for Federal Income Taxes not exceeding 2% per annum and will assume the payment of any Pennsylvania State Tax not exceeding 4 mills annually, and will agree to refund the Massachusetts Income Tax up to 6% per annum on income derived from the bonds; all as provided in the Mortgage.

Mr. C. H. Geist, President of the Company, has summarized as follows his letter to us describing these bonds:

Philadelphia Suburban Water Company (formerly Springfield Consolidated Water Company) owns and operates the water system supplying without competition substantially the entire suburban district of Philadelphia. The territory served has an area of 260 square miles and is largely residential in character. The remarkable suburban development of Philadelphia, particularly within the last few years, has caused a rapid increase in population and in the demand for service in the Company's territory. The population increased from 95,000 in 1900 to 120,000 in 1910 and to 176,000 in 1920. It is at present estimated to be over 240,000.

The Company obtains its water from three streams, each situated in a separate water shed. Its three pumping stations, with modern filtration plants, are located at these sources, and the water is distributed through 689 miles of mains. Reservoirs and standpipes are advantageously located throughout the territory, thus furnishing fire protection and maintaining adequate service and pressure. The entire property is well maintained and in good physical condition. The normal run of the streams is well in excess of the present demand. According to independent engineers, the streams, with the establishment at reasonable cost of storage capacity, will furnish water sufficient to meet the demand of the next fifty or more years. The quality of the water is excellent, the results of analyses easily conforming to the requirements for drinking water prescribed by the United States Public Health

The value of the property of Philadelphia Suburban Water Company was fixed as of December 31, 1923, at \$17,500,000 by the Pennsylvania Public Service Commission. Expenditures for additions during 1924 aggregated approximately \$1,000,000, making a total of \$18,500,000, as compared to the Company's total funded debt of \$10,249,000 to be outstanding upon completion of this financing.

The First Mortgage Bonds will be secured by direct first mortgage on the entire property of the Company now owned except for two small divisions upon which they will be subject to \$249,000 (closed) underlying bonds. In addition, the Mortgage will be a direct lien on all the property of the Company (except shares of stock, bonds and other securities unless specifically pledged) hereafter acquired, subject to existing prior liens (if any) upon such property, for which additional bonds may be issued under the conservative restrictions to be contained in the Mortgage.

The proceeds of these \$10,000,000 Bonds and of an issue of Preferred Stock will be used to retire all of the Company's present funded debt (except the \$249,000 divisional underlying bonds), and to reimburse the Company in part for expenditures already made for additions and extensions to its property.

BROOKLYN HAS BEST SHOWING

Return to Form of Vance Championship Tournament and Grimes Gives Superbas Needed Impetus

NATIONAL LEAGUE

RESULTS SATURDAY Boston 2, Chicago 1. St Louis 8, New York 0. Brooklyn 5, Cincinnati 3. Pittsburgh 6, Philadelphia 5. RESULTS SUNDAY New York 8, St. Louis 3. Brooklyn 9, Cincinnati 8. GAMES TODAY Chicago at Boston. Pittsburgh at Philadelphia.

Brooklyn, with its pitchers, A. C. Vance and B. A. Grimes, rounding into shape, did better than any club in the National League in the past week of winning five games and losing two. The New York Giants still leading the league won four and lost two and the Boston Braves won four and lost two. Cincinnati and Chicago, onsidered pennant contenders, slipped little in their dash after the Giants, former losing three and the latter, with neither team winning a game in the past week.

rame in the past week.

The Glants, in first place with 14 dictories and 6 defeats, are firmly lixed. There is little chance of their being displaced within the next week at least and it is somewhat doubtful if any team can displace them this season. Urged on by the prospects of winning their fifth straight pennant and thereby setting a new record for major league baseball, the Giants have major league baseball, the Giants have wrested games from their opponents in the ninth inning when the scores were much against them. This is generally accepted as the mark of a champion. The team has made most of its progress against Philadelphia, St. Louis and Boston, generally considered the weakest teams in the league. May 13, the New York club meets what is considered its first real opposition opening a series with Cincinnati. The fans will then get a real idea of the club's chance to win again dea of the club's chance to win again and of the Red's strength which is considered great this year. Cincinnati, after giving the Giants

chase for the first two weeks, fell into a slump last week, losing three games and winning none. This has forced them down to fourth place in the standing. With the approach of the New York series, Cincinnati fans are in hopes of the team getting back nearer the top at the expense of the champions. Although losing three games, the pitching staff has been going along well, losing by only a

Chicago has had about the hardest time of any club in the league. With many of its regulars out, the team has made a promising showing. Mana-ger William Killifer said Saturday that he was optimistic about the club's chances because it had made such a good showing in the condition it is now in, and there was much hope the future when all the regulars

Pittsburgh, in last place, is the sur-Pittsburgh, in last place, is the surprise of the season. Few of the managers can explain the situation, some saying it is due to a lapse in pitching. With one of the fastest, if not the fastest team in the circuit, and a group of hard hitters, the team has made little progress. Boston in its turn has also surprised by its good playing. The Braves have had exceptional pitching and it may be that claim of Manager D. J. Bancroft year that his pitching staff was of the best in the league and that began to show its real strength, there would be a marked change in the club, may be authenti-cated this season. Certainly there are few teams which have had the pitching that the Braves have had in the early season play and the club is also hitting hard. The Braves of 1925 look 100 per cent better than last year.

ITALY ADVANCES IN DAVIS CUP TENNIS

LISBON, Portugal, May 11 (P)—The Portuguese Lawn Tennis team took one of the singles matches in the final day's Davis Cup play yesterday when S. D. Casanova defeated Serventi of Italy, 4—6, 6—4, 2—6, 6—4, 8—6. Baron H. L. de Morpurgo of Italy in the other match defeated Verda, 6—2, 6—1, 6—8, 6—2.

The day's play had no effect on the outcome of the Day's Cup tie between the two countries, as Italy eliminated Portugal by taking the first three matches, on Priday and Saturday.

In Saturday's play Baron de Morpurgo and Signor Gaslini, the Italian team, defeated S. D. Casanova and Senhor Vasconcellos of Portugal, 6—3, 6—1, 3—6, 9—7.

GRINNELL WINS MEET EASILY
GRINNELL, Ia., May 11 (Special)—
Led by Capt. Morgan Taylor '26 6f
Olympic hurdling fame, the Grinnell
College track team swamped the Drake
University team in a dual Missouri Valley Conference meet here, Saturday. The
wearers of the Maltese cross won 10 out
of 15 firsts and ran up a total of 81
points against the Bulldog's 50. Taylor
was high-point man of the meet, taking
firsts in both hurdles, second in the
broad jump and tying three others for
second in the high jump. Merritt
Scharnweber '26, Grinnell, came in
second with firsts in the 100 and 220
yard dashes and a place on the winning
half-mile relay team. S. E. Orebaugh
'25, Drake, ran a close third in individual points, taking firsts in both the high
and the broad jumps. Grinnell cleaned
up in both the hurdle races, also in the
discus throw. Drake slammed in the
half-mile, pole vault and in shotput Records were made by R. F. Daibey '26,
Drake and Foster Rinefort '27, Grinnell, respectively. The vault was won
at an even 12ft., while the discus was
thrown 126ft, 3½in. GRINNELL WINS MEET EASILY

BROOKLYN BEATS CANADIANS NEW YORK, May 11—Pitted against a picked team of Canadian soccer players representing the Province of Quebec Football Association, the Brooklyn Wanderers, of the American Soccer League, came through with a decisive victory by the score of 2 goals to 0 at Hawthorne Field, Prooklyn, yesterday.

YARWOOD WINS CYCLE BACE NEW YORK, May 11—William Yar-wood of the Century Road Club, Phila-delphia, defeated 90 contestants yester-day in a 50-mile cycling road race through two countles. Yarwood also won the Hill prize, an award offered for the leader over six hills which marked the course.

WIRIATH BREAKS BECORD PARIS, May 11 (P)—Paul Wiriath, the French runner, yesterday broke the French record for one mile at the Pershing Stadium. He covered the distance in 4m. 20 1-5s, in the twenty-fith renewal of the open challenge event. The former record was 4m. 21s.

DARTMOUTH OPENS WITH WIN HANOVER, N. H., May 11—The Dartmouth College track team opened its home utdoor season by swamping Wesleyan niversity, 115 to 20, Saturday.

Este Alibis Takes Five-Women's Title

National Bowling Association Comes to an End

CLEVELAND, O., May 11 (Special) The eight annual championship tour-nament of the Women's National Bowling Association closed here Sun-day after 14 days of competition in which women from 15 states partici-

pated.

The Este Alibis of Chicago won the The Este Alibis of Chicago won the five-woman championship with a score of 2518. The Misses M. A. Baker and M. I. Ebert of the same city took the doubles title with 1119, while Mrs. Edith Reich of Chicago rolled the highest individual score, 622. Edith Reich of Chicago rolled the highest individual score, 622.

Mrs. Reich's score was a new tournament record. One other new mark was established, 1703 in the all-events by Mrs. Grace Garwood of Cleveland. The first leading prize winners in the different events follow:

Which competed.

Each winning crew obtained its glory on merits alone, although, in the varsity race, Penn was matching Harvard, sprint for sprint, and appeared to be possessed with plenty of reserve power until No. 6 broke his oarlock and cast aside the useless oar, but continued to carry on the hodily

COX BREAKS RECORD: OKLAHOMA NINE WINS

NORMAN, Okla., May 11 (Special)
-Arthur Cox '26, University of Oklahoma, broke the world's intercollegiate

homa, broke the world's intercollegiate record in the javelin throw Saturday afternoon when he hurled the spear 208ft. 2½in. in a dual meet with Central State Teachers College. He established a record of 197ft. 6½ in. at the Kansas Relays recently. Oklahoma won the meet, 111 to 20.

Oklahoma's baseball nine won its seventh Missouri Valley Conference victory by defeating Washington University, 5 to 4, here Saturday. The visitors got seven hits to four for Oklahoma, but the locals scored three runs on errors in the early innings.

Batterles—Hunter and Mayes; Thym and Conrades. Umpire—Earl Jones. Time—1h. 50m.

Pennsyl

DASH RECORD IS TIED

field meet here.

DeHart Hubbard '25 of Michigan

DeHart Hubbard '25 of Michigan tied the world's record for the 100-yard dash with a mark of 9 3-5s. He also captured the broad jump with a performance of 25ft. 1/2 in. tied the world's record for the 100-yard dash with a mark of 9 3-5s. He

Northrop '26 of Michigan points each. Guthrie won the 220-yard low hurdles in 24s., was second in the 120-yard high hurdles won by L. J. Snyder '25 in 15.1s. and placed in the Snyder '25 in 15.1s. and placed in the one better.

Sprints were then in order and the race had all the spectators interested for never before in recent years had for never before in recent years had its

MISSOURI WINS, 81 to 36

COLUMBIA, Mo., May 11 (Special)—
University of Missouri defeated Kansas
State Agricultural College in a M. V.
Conference dual track and field meet,
here, 81 to 36. A. I. Balzer '25 of the
Kansas Aggies established a new Missouri Valley Conference record of 9m.
42½s. in the two-mile run. M. C. Keeble
'26. Missouri, was high-point man of
the meet with first in the 120-yard high
hurdles with 15¾s. and second in the
220-yard low hurdles and the broad
jump. The meet was held on a track
made somewhat soggy by a night rain,
but time was good in most events. A. D.
Bond '25 of Missouri won the 100-yard
dash in 10½s., and the 220-yard dash
in 22½s.

IOWA STATE NINE WINS COLUMBIA. Mo., May 11 (Special)—
Iowa State College defeated University of Missouri in a M. V. Conference baseball game here Saturday afternoon, 10 to 1. The game was played on a makeshift grass diamond, because a heavy rain had soaked the regular field. Friday's game was at first postponed until Saturday morning and then cancelled on account of rain. PURDUE WINS, TIES, LOSES
LAFAYETTE, Ind., May 11 (Special)
—Purdue University athletic teams in
dual, "Big Ten" meets here Saturday defeated Northwestern University
on track and field by a score of 72 to
63; tied Northwestern on the tennis
courts, 3 matches to 3, and lost to University of Chicago on the golf links, 11
to 10. With 10 olnts each, A. O. Martin
"25 of Northwestern and W. B. Young
"25 of Purdue won high individual scoring honors. Martin won the 400-yard
dash in 49 4-5s. and the half-mile run
in Im. 55.8s., bettering by .6s. the track
record for the latter. Young won the
100-yard dash in 10 3-5s and the 220yard dash in 23.5s. PURDUE WINS, TIES, LOSES

COPULOS WINS TWO DETROIT, Mich. May 11 (Special)—G L. Copulos, representing Detroit in the National Three-Cushion Billiard League, National Three-Cushion Billiard League, won both afternoon and evening games, from A. J. Thurnblad of Milwaukee, to close the season here. The afternoon score, 50 to 34 in 62 innings. High runs, Copulos 6, Thurnblad 4. The evening score was 50 to 36 in 46 innings. High runs, Copulos 7, Thurnblad 5. Copulos tied J. M. Layton of Minneapolis for second place with 89 games won and 43 lest in the league race.

STEVENS SCORES TWO

NEW YORK, May 11—New Bedford beat Indiana Flooring. 3 to 1, in an American Soccer League game here Saturday. Crilly scored the first goal after 29 minutes of play, but in a mixup five minutes later the ball bounced off Brown into his own goal for the equalizer. After the interval the New Englanders served up some great football. Two brilliant goals by Stevens, the old Boston player, completed the scoring.

BETHLEHEM PUT OUT University, 115 to 20, Saturday.

YALE '28 DEFEATS ANDOVER
NEW HAVEN, Conn., May 11—The
Yale freshmen track team defeated Phillins Andover Academy Saturday at Yale
Field, 83 to 43, the Elis winning 10 first, and nine second places.

BETHLEMEM FOR OUT
Herovidence Soccer Club surprised yesterday afternoon when it defeated Bethlehem, 1 to 6, in the last American Soccer League game here this season. The defeat spoiled all chances Bethlehem has of winning the championship.

PENN SHARES WITH HARVARD

Crimson Varsity Wins in 9m. 11s., While Penn Takes Other Regatta Races

University of Pennsylvania and Harvard University crews shared top honors in the quadrangular regatta on the Charles River Basin late Sat-urday afternoon, the former winning the freshman and junior varsity races while the latter captured the feature event between the four varsity crews which competed.

but continued to carry on the bodily motion for the continuance of the rhythm. Still the Penn crew continued to pace with the Crimson and No. 6 was hardly noticed by the thousands viewing the race. It soon became apparent that something was radically wrong for the Penn crew suddenly lagged behind and the Crimson oars-2392 men swept on at top speed to win in 2405 just 9m. 11s., a course record for the

1%-mile distance. Penn's freshman crew came up to its reputation and captured the year-ling event by 2½ lengths from Har-vard in 6m. 54s. over the Henley distance. Rough water compelled the referee to change the distance for the freshman and junior varsity races. Harvard's yearling crew crossed the line in 7m. 2s. and Massachusetts Institute of Technology came third with a time of 7m 6s. Cornell University, a consistent fourth throughout all the

Juniors Make Record The junior varsity of Pennsylvania at the word "row" from Referee W. I. Badger Jr '13 of Yale forged into the lead and from then on maintained it with Harvard forcing the pace until nearing the finish when the Crimson slipped behind. The junior time of 6m. 51s. made by Penn is also a

ourse record.
All of Penn's crews were far smoother than any of the others, and their early-season preparations were easily in evidence. Harvard's showing was gratifying to its coach and followers, for it has been several years since Crimson varsity crew-crossed the line first in these races. Harvard showed excellent qualities in sprinting, and though Penn may have rowed far smoother, it failed to best the Crimson

day afternoon when he hurled the spear 20sft. 2½in. in a dual meet with Central State Teachers College. He established a record of 197ft. 6¼in. at the Kansas Relays recently. Oklahoma won the meet, 111 to 20.

Oklahoma's baseball nine won its seventh Missouri Valley Conference victory by defeating Washington University, 5 to 4, here Saturday. The visitors got seven hits to four for Oklahoma, but the locals scored three runs on errors in the early innings.

H. A. Hunter '26, Sooner pitcher, made two hits in three times at bat, one of them a triple. He retired the side on strikeouts after two men had scored in the fifth. Only 12 men faced him in the first four innings.

Pennsylvania Favored

The earlier races seemed to indi-cate that the varsity race would also BY DeHART HUBBARD be won by Pennsylvania, for its two previous triumphs were with comparative ease, always stroking between 30 to 34 and maintaining the lead. Fur-COLUMBUS, O., May 11 (Special)—
By a score of 84 to 51, University of Michigan defeated Ohio State University in a dual "Big Ten" track and starting line for what looked to be a starti half-length jump on the others. also captured the broad jump with a performance of 25ft. ½in.

High-point scoring was done by G.
P. Guthrie '26 for Ohio and P. M.
Northrop '26 of Michigan with 12 points each. Guthrie won the 220-yard low hurdles in 24s., was second in the front, but not for long, as the Crimson coxswain and nosed out front, but not for long, as the Crimson coxponent in the company with the company with the crimson coxponent in the company with the crimson coxponent in the crimson c

grettable accident occurred to the Pennsylvania boat. What might have happened if all had been well will never be known, but before it occurred Pennsylvania never appeared a better eight than Coach E. A. Steven's crew. When Pennsylvania weakened it was only natural that the Harvard eight swept out ahead, but not until the Red and Black boys gave their all, which constituted a seven-oar boat versus an eight-oar boat for nearly a quarter-mile. Darkness prevailed at the finish and although the times were announced for Pennsylvania, Tech and Cornell their accuracy was to be questioned. Pennsylvania was credited with 9m. 22s., Tech with 9m. 40s., Cornell 9m. 49s.

MINNESOTA DEFEATS CHICAGO IN DUAL MEET

CHICAGO, May 11—University of Minnesota defeated University of Chicago in a "Big Ten" dual track and field meet at Stagg Field, here, by a count of 86½ to 46½. The Gophers captured nine firsts, tied for another, and allowed Chicago only five. The winners scored a slam in the hammer throw, won by T. T. Cox '26 with a toss of 127 ft. 4in.

Scoring honors were captured by

toss of 127 ft. 4in.
Scoring honors were captured by C. H. Schutte '25, who won fame as a halfback on the football field last fall. He compiled 11 points for Minnesota, with first in the shotput, with a performance of 40ft. 5in., first in the discus throw with 126 ft. 1in., and third in the 100-yard dash.
William Gruenhagen '26 and C. S. Mattice '27 each counted 10 points for Minnesota. Gruenhagen won the City of New York and the University of Pennsylvania contested a match on four boards at the rooms of the University of Pennsylvania Chess Club in Houston Hall yesterday. This result was undecided, the score at the end being 12 3-5s. Mattice won both hurdle races, taking the 120 high in 15.9s. and the 220 low in 261-5s.

J. J. Cusack '27, won the half year. J. J. Cusack '27, won the half mile run for Chicago in 2m. 2 2-5s. after an interesting battle with Theodore Scar-borough '27 of Minnesota. H. P. Bourke '25, won the two-mile race for

PHILADELPHIA, Pa., May 11 (Special)—The New York Giants won easily from the Philadelphia Field Club in an American Soccer League match here, on Saturday, by 4 goals to 1. The New York team led at half time, 2 to 1. McDonald, left fullback of the Philadelphia team, further boosted New York's score when he accidentally booted the ball through the net in the second half. Center Forward Brown scored two of the visitors' goals.

PHILADELPHIA, Pa., May 11—Phila-delphia's American league soccer team played its final title game here Saturday, losing to the New York Giants, 4 goals

Many Nations Enter British Golf Play

By The Associated Press London, May 11 FIVE Americans are among the 151 golfers entered for the

British amateur championship to be played at Westward Ho during the week beginning May 25. Largely because of the inaccessi-bility of the course, the number of participants will be the smallest since the event was last decided on the north Devonshire course in 1912 It will be a very cosmopolitan crowd of competitors, with the first

German contestant entered in a British golf championship since before the war. There are other entries from France, Argentina, and such far away British colonies as Malay, Ceylon, and New Zea-Two Americans, J. S. Bailey of the Oak Hills Club of Cheago and L. V. Cochrane of the Onwentsia Club of Chicago, are in the upper half of the draw. The other three,

R. A. Starnahan of the Inverness Club of Toledo, A. F. Bourne of the Garden City Club of New York, and Douglas Grant, an American resident of England, who reached the semifinal round of the British amateur championship in 1923, are in the lower half. Most of the best golfers of Eng-

land are entered for the amateur championship this year, but some of the usual Scottish contingent will be absent because of the long distance that must be traveled to reach Westward Ho. C. J. H. Tolley and Sir E. W. E. Holderness, the holder of the title, are both in the top-heavy first quarter of the draw, where there are no American names, while R. H. Wethered is in the third quarter along with Douglas Grant, Lord Charles Hope, the veteran H. H. Hilton, and the Toledo entry.

POYNTON WINS ROAD WALKING CONTEST

were sent away at Bordeaux at 7:15
o'clock Saturday night, and Suter
reached Paris at 3:45 yesterday afternoon. He covered the 370 miles in about
20h. 30m.

Tennis Players to

United States Expects to Welcome Many Who Have Not | Tremendous Hitting Power Played in America

NEW YORK, May 11—This season promises to see the greatest migration of lawn tennis players that the world has ever known. The United States will be exceptionally fortunate in welcoming numerous players who have not heretofore been seen upon the courts of this continent. Spectators in almost every section of the country will have one or more opportunities for witnessing the experts of other tennis-playing nations in action upon tennis-playing nations in action upon United States and Canadian courts against the leading exponents of North America. The invasion will not

North America. The invasion will not be confined to men players, as two women's teams are scheduled to cross rackets with American stars during the coming summer.

England is to send a team of four or five players for competition for the Women's International Team Trophy, and this match will be played at Forest Hills, L. I., Aug. 14 and 15, and the following Monday the women's national singles and doubles championships will begin on the same stretch national singles and doubles champion-ships-will begin on the same stretch of turf. The personnel of the Eng-lish team has not been announced in full as yet, but it is known that Miss Kathleen McKane, the English cham-plon, who defeated Miss Helen Wills at Wimbledon last summer, will lead the combination.

In addition to the English team In addition to the English team Australia is expected to be represented by a quartet of women players, which, according to cable announcements, will include Miss Daphne iAkhurst, triple champion of Australia, Mrs. R. R. Harper, former champion, Miss E. Boyd and Mrs. H. S. Utz, the chart the strongest the strongest quartet being considered the strongest that can possibly be selected from Australasian women's tennis ranks. These players will visit England and play in the English championships at Wimbledon prior to coming to the United States. Upon their arrival here one and possibly two team matche against American women combina tions will be arranged.

Davis Cun teams will also bring to this country new players, who are likely to compete in some of the na-tional championships in addition to tonal championships in addition to their necessary Davis Cup ties. The New Zealand team, which elected to play in the American Zone, will come by the way of Canada, playing one and possibly two ties in Canada, and then possibly proceeding to the United States for further Davis Cup or individual connection. Much interest is vidual competition. Much interest is being evinced in the New Zealand team as it is understood that it will be composed entirely of young players of exceptional promise.

MINNESOTA SPRINGS SURPRISE
MINNEAPOLIS, Minn., May 11 (Special)—University of Minnesota won its
first Western Conference baseball victory of the season here, stopping Indiana University's string of victories,
in a one-sided surprise, 9 to 1. The
game was marked by the brilliant batting of the Gophers and the excellent
pitching of Peter Guzy '27, who held
the visitors at bay. A single home run
by E. L. Druckmiller '26 of the Hoosiers
accounting for their lone score. J. B.
Emerson '27 also hit a home run for
Minnesota. A long three-bagger scoring
three runs marked the return to the
Gopher lineup of Capt. R. J. Christgau
'25, catcher, who played right field
against Indiana. The score by innings:

Ellis of Pittsburgh, here, Saturday, otto 127 in 33 innings. Both players had high runs avoid to appoint a committee to make the necessary arrangements for the refinancing of the schooner Columbia, the only possible entry from this port.

PHILADELPHIA IS FINNISH RUNNER Do Much Migrating LEADING LEAGUE

of Athletics Is Biggest Factor in Drive

AMERICAN LEAGUE RESULTS SATURDAY

RESULTS SUNDAY Detroit 13, Boston 5. Chicago 10, Washington 5 (12 innings) New York 13, St. Louis 1, Philadelphia vs. Cleveland (postponed). GAMES TODAY

Boston at Detroit. New York at St. Louis. Washington at Chicago. Philadelphia at Cleveland.

Manager Connie Mack's Philadel-phia Athletics with four victories and one defeat in last week's play, the best showing in the league, now lead the American League clubs with a game and a half advantage over Washington in second place. Washington in turn is only a half game ahead of the hard hitting Cleveland Indians. How long can Philadelphia maintain the pace is the question asked by baseball fans today. Remembering last year when the Athletics slumped while all was going along smoothly and the prospects of a pennant for Philadelphia appeared good, the fans are rather skeptical as to Philadelphia's chances. This is a new race, however, and profiting by last year's mistakes Connie Mack's club must be figured this year as a pennant contender unless something most unexpected happens. pace is the question asked by basebal

The Athletics have the hitting of a pennant winner. The pitching is medi-ocer and the fielding is nothing excep-tional. If the pitching should slip, the tional. If the pitching should slip, the hitting might carry it along, but with such teams as Cleveland and Washington close behind, it will require both hitting and pitching to keep up. Cleveland and Washington both went into a bad slump last week, the former winning one and losing three and the latter winning two and losing three. Philadelphia has met and conquered Cleveland and New York and divided the four games with Washington. The Indians have yet to beat the Athletics, the leaders in the league having cap-

Indians have yet to beat the Athletics, the leaders in the league having captured two games from Cleveland.

Just as much a surprise as the good showing of Cleveland and Philadelphia has been the poor showings of New York and Detroit. Both pitching staffs have failed utterly although the hitting of each team has been tremendous to say the least. As a matter of comment it is noticeable in the league this year that hitting, rather league this year that hitting, rather than pitching, seems to be the most important factor of each club. Even Boston in last place has tremendous Boston in last place has tremendous hitting power. In the three games played Sunday the winners scored 13, 16 and 13 runs, while the losers made 13 runs all told. This is an example of what has been going on nearly all season. The scarcity of small score

Chicago and Detroit in the coming week and either Detroit or New York trailed with 15. The Midshipmen captured only three out of eight firsts in the track events, but took first in six out of seven of the field events.

North Carolina finished second with 37½ points, and the University of Maryland trailed with 15. The Midshipmen captured only three out of eight firsts in the track events, but took first in six out of seven of the field events.

Sox have neither the hitting or pitching of a first-division club, in this race. Washington plays St. Lohis and Cleveland in the coming week's play and Philadelphia has Detroit and Chicago as opponents. Cleveland and Philadelphia has Detroit and Chicago as opponents. Cleveland and Philadelphia have their last game of their series, today.

The "Big Three," including Wash-lock of the field events.

North Carolina finished second with 37½ points, and the University of Maryland trailed with 15. The Midshipmen captured only three out of eight firsts in the track events, but took first in six out of seven of the field events.

BOSTON DEFEATS FLEISHER TARN
Boston Soccer Club were the victors, and Duggan followed with another soon again got through before half lime. J. Ballantyrie scored for Boston in minutes after resuming. Just before the final whistle Brown broke through, sending one to Moorhouse. The outside left made good with a hard drive.

series, today.

The "Big Three," including Washington, Philadelphia and Cleveland have furnished fans with an interest clubs have maintained triple ties for first place only to have one or the othe take the advantage. Although these three clubs and Chicago have stayed as close if not closer together than the teams in the first division of last year's race, which was considered the best in the history of baseball, the race as a whole has not been as compact as last year. Boston in last place is eight and one-half games behind the leading Philadelphia team and New York and Detroit are nearly as bad off.

FALL RIVER, 9 TO 0 FALL RIVER, May 11—Fall River yesterday captured the American Soccer League pennant for the season of 1924-25 here yesterday afternoon, defeating Fleisher Yarn of Philadelphia, 9 to 0. This is a goal record for the season in the league.

IOWA WINS AT TENNIS MADISON, Wis., May 11 (Special)— University of Iowa tennis team defeated University of Wisconsin, 5 to 1, here Saturday. A clean sweep in the singles events was made by Iowa, while the doubles matches were divided between the two teams.

CHICAGO. May 11—A. H. Kleckhefer and A. K. Hall of this city divided their hat two games of the season in the National Championship Three-Cushion Billard League here. Hall won the afternoon encounter 50 to 33 in 50 innings, while Kleckhefer took the night match 50 to 39 in 41 innings. High runs of \$ and 6 were made by Kleckhefer, 6 and 7 by Hall.

season. The scarcity of small score games is interesting.

The Yankees in sixth place won three and lost two last week, showing a little progress. The team will face Chicago and Detroit in the coming week and either Detroit or New York should replace Chicago in the first division before next Monday. The White Sox have neither the hitting or pitching of a first-division club, in this race. NAVAL ACADEMY WINS

HARVARD TWELVE **DEFEATS TIGERS**

Nurmi, Quist, and Ritola Are Crimson Lacrosse Team Wins in Overtime Contest, 2-1

NEW YORK, May 11 (P) — Paavo
Nurmi, remarkable athlete from Finland, stands exonerated of all charges
that he has stepped of the path of
amateurism in his running in the
United States. Hugo Quist, manager
of Nurmi's American tour, and Willlam Ritola. Finnish distance man,
also have been cleared.

A committee of the Amateur Athletic
Union Saturday cleared the men in a
statement which went so far as to censure K. L. Wilson, athletic director of
Drake University, who had brought
charges that excessive expense money
was demanded for their appearance in
the Drake relays at Des Moines two
weeks ago.

Wilson, the statement said, "should
be censured for engaging a representative to obtain Nurmi's entry and for
making an offer to Nurmi which is in
yiolation of all amateur rules."

A two-day hearing conducted by the
committee, of which the national secretary, F. W. Rubien, was the head,
developed the fact that Wilson had winning goal resulted from a face of teamwork between C. W. Gillies '26 and W. A. Morrison '25, the former scoring on the Tiger goalie. Princeton renewed its vigorous attack and twice cleared the Crimson outer-defense but was held out by the spectacular goal-tending of H. L. Kelsey '26. The PRINCETON

HAPPY DAYS at CAMP

The prospect of a summer at camp would send a thrill of delight through almost any boy or girl. And what would be better for them than a whole summer of happy, carefree days—a summer in the out-of-doors, browned by the sun and refreshed by the waters-days filled with things young folks like to do, swimming, boating, riding, playing, eating.

At camp they would enjoy the companionship of others of their own age, and qualities of character, such as self-reliance and fearlessness, would naturally develop. Counselors who know how to provide fun for the children would always be at hand to direct all activities. Here your children would

spend a happy, profitable vacation.

You will find that there are a number of these camps advertised in The Christian Science Monitor. You can rely upon them because careful investigation has been made before accepting their advertising. An inquiry directed to one of them will bring you the necessary

information. Camp and School advertising appears in the Monitor on Mondays and Thursdays.

Duplex Photogram Machine Introduced to Amateurs

C. Francis Jenkins Offers Small But Effective Outfit for "Hams" to Test

for this specific purpose.

There is a fine needle or contact finger on both the sending and receiving cylinders of the machine. In the transmission of a message or sketch, for instance, the electric current—say from an electric motor or radio batteries—passes through the needle on the transmitting cylinder and through the conducting medium (a copper sulphate solution) of the written lines of the message, and the current goes out into space on the current goes out into space on the radio carrier wave.

This same electric current, borne on the radio carrier wave, is intercepted by a distant radio receiving station using the Jenkins' duplex station using the Jenkins' duplex photogram machine. This current, upon reaching the receiving cylinder of the apparatus, electrolytically discolors the moist paper. The latter may be moistened with any acceptable solution—for instance, potassium iodide or ferricyanide solution. The incoming radio current passes through the small needle or contact inger on the receiving cylinder and through the small needle or contact finger on the receiving cylinder and electrically discolors the white paper used in receiving the message. The result is a message, sketch, map, or autographed letter like the original, which was sent from the transmitting station.

A writing pen, mechanically oper-ated, may be employed with common writing ink on the cylinder used in receiving the message, but this is not as simple as the use of moistened paper, employing a copper sulphate solution. Regardless of whether you use a mechanically operated pen or moistened paper, this system of comdelivers the message at a speed of 186,330 miles a second. No dots and

American Labor's attitude in keeping itself free to take advantage of the activities of whichever political party in

British Labor Is in Period of Transition

the nation for the time being supports its views, was referred to by that somewhat pronounced Conservative, the Duke of Northumberland, in a recent speech at Guildford. England. The Duke

of Northumberland's contention was that the British workingman might do worse than follow the example set in the United States. His appeal was a purely party one. His immediate object was only to show that Stanley Baldwin, rather than Ramsay MacDonald, is British Labor's friend. Made as it has been, nevertheless, at a moment when changes profoundly affecting the orientation of the entire British Labor movement are in the air, it is not to be dismissed altogether summarily.

The nature of these changes has been clearly brought out at a conference of the Independent Labor Party, or "I. L. P.," as it is generally called, representing the left wing of British Labor, which has been in session in England. At this conference Mr. MacDonald was sharply criticized by some of his own followers, on the ground that he has abandoned in practice the Socialism for which he continues to stand in theory. His answer was that it is quite impossible to persuade Parliament, as now constituted, to pass Socialistic measures, and that the sensible thing to do, therefore, is to press only for such less fundamental changes in the interests of Labor as there may be some prospect of effecting. One of the debates which took place at the conference was on the subject of the nationalization of industry. This afforded evidence that Mr. MacDonald's endeavor to swing British Labor away from theory and toward methods of common sense has the driving force of a majority of his party behind it.

One of the points discussed was as to whether or not compensation ought to be paid to owners whose property is taken over by the state: "If," said Hugh Dalton, Labor Member of Parliament for Peckham, who proved to voice the views of the majority of the 5000 Labor delegates present, "the principle of compensation is not admitted, you will be counting out against yourselves in advance millions of working class

In vain, John Maxton, representing the orthodox Socialist minority, reminded the delegates that they had all, in their Socialist processions, carried banners inscribed "Rent is Robbery," and "Profit is Robbery." To adopt the position that compensation was due to those whose possessions might be taken over by the state, he urged, was therefore to stultify themselves. Mrs. Sidney Webb, the gifted wife of the former president of the Board of Trade, has since summed up the situation. The British Nation, she says, is not extreme. Labor must therefore be moderate, because the electors are moderate. It is no longer the case of "a little sect trying to impose its doctrines on a great body of people.'

Vision is thus coming to those who lead Labor in Britain. The truth is beginning to be recognized that political power can nowhere be held permanently by extremists of any kind. If Labor is ever to rule at Westminster-where hitherto it has only had office bereft of powerit must become more than the champion of a single class. It must aim at something better than victory for a particular economic creed. It must broaden and deepen itself until it can claim to speak for the British Nation as a whole. Whether this is possible through the agency of a political party, committed at least in theory to the narrow denominational outlook of crusaders against capital, or whether any better organization can be substituted which does not suffer from the same inability to co-ordinate itself with the system on which material civilization has been largely built up, is a question for

which an answer must sooner or later be found. If Socialism is to prevail it must develop such attributes of moderation as to disarm those who now see in it an instrument of class war. If this cannot be, then Labor, as the Duke of Northumberland has suggested, may have to consider in Britain, as it has already considered in the United States, whether a political party based upon theories of antagonism to the capitalistic partner in industry is either the only, or the most effectual organization for furthering the great national interests at stake.

It seems almost unbelievable that an organization so devoted to the good of the city as the

Harking Back to Barbarism

Chicago Association of Commerce should sponsor such an event as the world's championship rodeo. Yet such is to be the case if the present plans, given publicity in the May 2 number of Chicago Commerce, are

allowed to mature. The article describing this world championship "rodeo of all rodeos" is given the leading place in the periodical mentioned, beside the leading editorial space for comment and approval. It is blazoned forth under the caption, "World's Championship Cowboy Contests," and the announcement is made that contracts have been made on a basis of five years with the intention of continuing indefinitely from year to year.

And now to consider some of the features of this "thrilling, stupendous spectacle with the most famous cowboys and cowgirls taking part in the various contests ranging from broncho riding to steer wrestling and trick horseman-One is assured that the bucking bronchos, wild horses and angry steers "are out to do their wickedest best," and one is informed that for the steer-wrestling contest the management will bring specially selected long-horn steers from Texas, these animals being untamed steers of the prairie, which "do not know the meaning of the word captivity." Finally, one is told that this sport "brings out in young men a quality that this generation needs-the spirit of taking a chance." "Chicago's rodeo." one reads, "with its large purses, will be the last word in world's championship cowboy con-

tests. It will be the last word in thrills and excitement, and the spectators who sit in the big Grant Park Stadium to watch the bucking bronks,' the plucky riders and the exhibitions of horsemanship are going to view the last truly American sport, which in itself will be an education.

Thus is being launched an educational campaign for a nobler American "spirit." But it is not education that is aimed at. It is financial gain. And this statement is not made without authority, for the editorial in the paper mentioned above lets the cat out of the bag in one sentence, when it speaks of the "contest extraordinary" as "an institution which can be indefinitely maintained with profit." Citizens of Chicago will most certainly rise up in protest against this degrading exhibition of coarse, inhuman brutality, and they may rest assured that adequate "profits" will be forthcoming for their needs from sources, the utilization of which will not make them ashamed to look the rest of the world in the face.

There can be nothing but approval of the

French

Students

and

Germany

decision which the French students have reached in respect of their German fellowstudents. They wish to reknit the old international ties and to strengthen them. In their national congress, which was recently held.

they examined the delicate question of admitting German students to the International Federation of Students, and the attitude which they took up proves once more that the young men of France in the schools have a wide vision and are ready to support any movement which makes for the fraternity of peoples.

It is sometimes represented that the reactionary elements predominate in the Paris university, and this assertion is backed up by references to the part which the students undoubtedly played in bringing about the downfall of the Herriot Government. Overzealous followers of M. Herriot and M. François Albert, who was the Minister of Education, could not conceive of a strike of students in protest against ill-advised action of the Government as being inspired by purely corporate considerations. They declared that the university was a hotbed of royalism and of reaction.

Happily, the national congress of French students has quickly disproved a contention which should never have been made. Everybody acquainted with the French universities knows that, although the young men in them are naturally not all of one opinion, there is a large proportion of ardent advocates of international friendships, and the League of Nations in particular has found one of its strongholds in the Sorbonne.

The student problem was not altogether a simple one. There are forty-three associations of students belonging to the different countries represented, and the general feeling was that German students should not be excluded. Nevertheless, the Germans did not present themselves as a national body. Instead of forming a union which would group together only their own nationals, they constituted a union of students speaking the German tongue, to which have adhered Austrians and even Alsatians and, to some extent, Turks.

Thus, the German union was not exactly on the same footing as the French association and the other national associations. But after some discussion the meeting resolved to raise no obstacles. The motion that was carried read:

The French National Union wishes to express its sincere desire to collaborate with the German National Union on condition that the latter comes only in a corporate character and accepts loyally and sincerely the statutes of the International Federation of Students

This conclusion is extremely satisfactory and is one more sign that France and Germany are beginning to forget the animosities engendered by the war and are prepared to work together in many domains. They may work together, not only educationally but economically and politically. In spite of various fluctuations of feeling, in spite of inevitable vicissitudes, progress is indeed being made, and the French students in holding out a hand of welcome are deserving of praise.

In an address delivered at the annual dinner of the American Marine Association, in New

Cheap Holidays Aboard Ship

York, a few nights ago. Edward A. Filene, president of William Filene's Sons Company, of Boston, forecast the early beginning of what he referred to as a new era in overseas travel. He

believes the day is near at hand when Americans will be able to enjoy a vacation trip to Europe at a cost not exceeding that of a holiday at home. The tendency is. quite naturally, to abolish the old class limitations on ocean steamships, just as it has been abolished on American railway trains and in hotels. As there are now differences in the rates charged on trains and in hotels, according to the accommodations provided and the service offered, so also will there be higher and lower rates upon the ocean, according to the appointments, speed, and size of the ship.

The proposed plan is to abolish on each ship all lines which now segregate passengers into classes according to the rates paid. This, conceivably, will be to the advantage of the carrying companies as to the passenger who desires to travel cheaply. Restrictions which have reduced the number of emigrants which formerly crowded the second and third class decks of transatlantic steamships have materially reduced the revenues of the transportation companies. An effort to recoup this loss has been made by the offering of greatly reduced rates to student tourists, with the result that the volume of summer travel from the United States to Europe has been larger than in former vears. But Mr. Filene believes it would be to the advantage of all concerned were it agreed that all boats should henceforth be made one-class instead of three-class boats. He predicts that vessels of the type to meet the needs of every tourist will be provided, with some offering round trips from the United States to Europe at \$125, and voyages with a week ashore at \$175.

A unique feature of the proposed "democratization" of ocean travel is the abolition of the present table d'hôte service and the substitution of cafeteria systems, under which each passenger would pay for what food he chooses, waiting upon himself. Thus there would be effected a tremendous saving in the amount of food now wasted, as well as in the operating costs and the number of stewards employed.

The advantage to the steamship companies, it is estimated, would be in the greatly increased number of passengers carried at the lower rates. Steamships, like railroad trains, are most profitably operated when they are carrying full loads. The greater the volume of business, the larger the profit. American economists have sought to convince railroad managers of the truth of this proposition.

No doubt hundreds of thousands of Americans would be quick to avail themselves, not only once, but frequently, of the opportunity to take a cheap vacation aboard ship. Many of them have "seen America first," just as they have been urged and advised to do. 'The automobile has carried the average vacationist far from home in all directions. It halts at the seaboard, however, and there the tourist heretofore has been obliged to stop. There are no first, second or third class tourists on American highways. Some travel in shinier and faster cars than others, but the "flivver," with its bulging freight of tent cloths and blankets. passes or meets the more pretentious car on common ground. And all guests look alike to the room clerk at the hotel. They would carry this same "democracy" onto the ships. Class distinction, after all has been said, is superficial, whether on land or sea.

The little red books that bear the name Baedeker have long been a matter of common

Baedeker

and His

Double Stars

knowledge and possession to all who have set foot in strange lands. Ever since the "grand tour" ceased to be the special privilege of the few, these compact and accurate compilations of travel lore have been a

practically indispensable adjunct to a traveling public. Way back in 1859 Fritz Baedeker took over his father's publishing house in Leipsic and commenced to issue travel books in English after the pattern set by "Murray's Guidebooks"; and all through these many years he has stood a valued friend and mentor to countless thousands, an ever-ready and dependable source of information and help. Now that he has left the far-flung lanes he charted so well, his labors will have acquired a new dignity. He will continue to serve as faithfully as ever through his ubiquitous bright-covered handbooks, but there will be an added meaning to this task from

now on. Above and beyond the utility and convenience of these manuals, however, may be placed their large service in the name of the fine arts. Except for such areas as the Far East, central and southern Africa and South America, practically the whole glossary of art is to be found in the various Baedekers. Most particularly have the magnificent repositories of European painting and sculpture, the endless sequence of monuments and edifices that proclaim its splendid tale of architectural unfoldment, all the thousand and one items of special artistic interest in Old World chronicles, been docketed and classified for the student of art by this assiduous company of Leipsicers.

Fortunately all this charting has been done with a not too impersonal touch. A certain emphasis, and a very important one for the beginner in art study, is to be found in the code of stars and double stars sprinkled here and there through the long lists of objets d'art, those famous double stars that mark the discreet docentship of Fritz Baedeker and that have become through common usage a household phrase. No matter how much individual ratings of art may differ, this graduated presentation in the little red Baedekers is sufficient to cover them all.

While the little books are rather looked down upon by the intelligentsia on its travels, yet it would be as amusing as it would be difficult to estimate how many now venerable authorities on art received their early instruction and impetus in these matters from these very Leipsic publications. And so let not the willing tourist, gazing in rapt attention on painting or carving, turret or terrace, taking his fill of fact and facet in fine obedence to his unseen cicerone, be too concerned for the tell-tale sign of the little volume in his hand. Let him rather be glad that he has such a good traveling companion on the road, and let him give a thought of gratitude to the man whose name is so indelibly picked out in those stars he so judiciously scattered in his firmament.

Editorial Notes

Upon the front page of the May, 1925, number of an eight-page periodical put out by Ginn & Co. under the title, "What the Colleges Are Doing," is an article captioned, "Academic Versus Bacchanalian Festivals." Its writer. after referring to a statement made by President Richards of Lehigh University, Bethlehem, Pa., to the effect that "the alumni constitute one of the most serious menaces to the development and maintenance of proper moral standards among students," calls attention to the numerous expressions of undergraduate sentiment in support of law enforcement in the United States, particularly in regard to prohibition. Then he writes:

It has been obvious too long and too frequently that the major contribution of some alumni rooters at purely academic as well as at athletic festivals is a bo "booze," a big bunch of "smokes," and a superabundant noise. This typical "rooter" is not the typical alumnus, by any means. No more was he a typical undergraduate when he then specialized on "flub-dub" while his better did the same on work, . . . and the old habit apparently survives.

And one might equally well add, for the benefit especially of those in countries other than the United States, and in amplification of the general theme of prohibition: Neither is the typical American lawbreaker, concerning whom so much is written, the typical American citizen, by any means!

What the Forests Mean to the Whole People

in spite of meetings, addresses; school exercises, numerous editorials in newspapers and magazines and many other means of instruction and appeal used to arouse the people's interest, there are large numbers of persons in the United States who either have not been reached by the efforts put forth or who, if they do take notice of the copious talk about the woods, say with a shrug: "What of it? What's the use of all this pother about a lot of trees? Where do I come in? I don't go into the woods and never expect to; don't hunt or camp or fish, and never will. I should worry! Let carpenters and lumbermen do that!"

It is perfectly true that the vast mass of the peo It is perfectly true that the vast mass of the people never do, and never will, hunt or camp or fish, or visit the woods for any reason whatever. The talk about forest preservation and development and the terrible waste of forest fires seems to them, consequently, to be mostly visionary "dreamstuff" or just theorizing. It is this great, inert majority of the population, keenly preoccupied with their own immediate interests and pleasures, that must be stirred and made to see where they do "come in," if the work of forest conservation, so vital to the presently and year, arisence of the Nation is to be the prosperity and very existence of the Nation, is to be performed adequately.

Thus there is pressing need of iteration and reiteration of argument, appeal and information to show how closely the woods do affect fundamental factors in the closely the woods do affect fundamental factors in the life of every man, woman and child in the Nation. If the whole people can be made to understand and appreciate that not only their comfort and happiness, but in fact their very welfare and existence, depend on an abundant, cheap supply of wood and on the maintenance of large areas covered by full-grown forests, the rest of the problem will be comparatively easy.

the problem will be comparatively easy.

We all know that a very large proportion of the houses in which Americans live, and of the buildings in which they work, is made of wood. Do we realize that ninety out of every one hundred buildings in the United States are of wood? Do we stop and think of what the "housing problem" would be if the supply of lumber were cut off? This consideration applies to the basic matter of shelter from the elements. It helps toward an understanding of how awkward, uncomfortable, even an understanding of how awkward, uncomfortable, even unendurable, life in the present state of American civili-zation would be without forest products, when one learns that wood in its original form or chemically or physically altered enters into 2000 articles of daily use, for the preparation of most of which there is as yet no suitable substitute

The high standard of comfort, convenience and luxury in American social life is based largely on the sumptuous abundance of wood products. It was not without a reason that in the Teutonic mythology the universe was represented as being upheld and supported by the tree

There can be little doubt that the low standard of living in certain countries is in large measure due to the scarcity and high prices of forest products. Amer-icans do not like to contemplate either living themselves or the danger of their children or grandchildren having to live under conditions that make such lower standards necessary. If they would not enjoy life in Asia Minor, for instance, where wood is so valuable that the timbers that must be used in a masonry house are counted, with jewels and costly fabrics, as the most desirable spoils of war, they have the means of avoiding such conditions

than that. Would the American people look with equanimity on the likelihood of such curtailment in their supply of wood? If they do not like the prospect, they must bestir themselves. The remedy is in their own

The millions of people who do not go into the woods or become acquainted with them and develop the dangerous "Who cares?" attitude, certainly have to drink and use water. Americans are the freest and most careless users of water in the world and their consumption is increasing by leaps and bounds. If they do not like the thought of going thirsty and of sharply cutting down their present lavish use of water, they must take steps both to save the forests of today and provide for their extension. For without abundant woods there can be no dependable supply of water for any purposes. The problem of getting water for the rapidly growing cities of the United States is becoming more pressing every year. There is only one way to solve it—preserve and increase the forests.

the forests.

As the supply of coal is pressed upon with increasing intensity and the price of that fuel steadily goes upward, there is a constantly growing demand for the utilization of "white coal" and the obtaining of more energy for heat, light and power by "harnessing" the rivers of the country. Great strides have been made in hydroelectric development. Plans for the expenditure of enormous amounts of capital in this direction are on toot. This development will mean increased wealth, inxuries, comforts and conveniences of life for unnumbered future millions of the population, if the process of "harnessing" the rivers can go on with all the energy and completeness of an enterprising and inventive people. But it cannot go on, and the dream of harnessing rivers cannot be realized, unless the forests are both saved and increased. Without the forests there will be no rivers to harness.

Enormous amounts of wood products that are lavishly turned out each year in the United States are wasted. literally thrown away, by careless methods of manufacture, handling and distribution. Producers and manufacturers of these products are awaking to the mistakes of the past and are seeing more clearly that they must change their ways for their own monetary benefit. Great good in this direction is bound to come out of "Forest Week." The aid given by enlightened lumber companies and individual producers and manufacturers in pushing the education of the public in regard to the situation is invaluable.

But a greater cause of waste that the people them.

situation is invaluable.

But a greater cause of waste that the people themselves must tackle and eliminate is that of forest fires.

E. T. Ailen, forester of the National Lumber Manufacturers Association, puts the annual merchantable timber loss of the country through forest fires at \$25,000,000, but in addition to that he estimates that the potential value of unmerchantable young trees destroyed by the fires each year is \$75,000,000. That makes a total of \$100,000,000 lost every twelvemonth. This, however, is only one-fifth of the ultimate loss, as the loss of market for labor and supplies that utterly disappears with the destruction of \$100,000,000 worth of timber is placed at \$400,000,000. Here, then, is a huge total of \$500,000,000 a year that is lost to the Nation.

Enormous as is this sum that is burned up annually.

Enormous as is this sum that is burned up annually, it takes no account of the measureless damage that is caused by the fires in soil erosion, diminution of future water supply, flood damage, decrease in public revenues, injury to general business and damage to contiguous

in their own hands. They can save their forests.

The National Lumber Manufacturers' Association estimates that the production of lumber in the United States in 1924 was 37,000,000,000 feet, or hard set along with a heavy load of responsibility to carry.

property.

In very truth, those who do not do their part to stop forest destruction by amending their own careless habits, and those who do not take some part in the efforts on foot to preserve and increase the woods of America, have a heavy load of responsibility to carry.

The World's Great Capitals: The Week in Moscow

One of the chief subjects of discussion in Moscow reently has been the assassination of the Polish revolutionists Baginsky and Vechorkevitch by the captain of the guard which was escorting them to the frontier. They were to have been exchanged for the Polish priest Ussas, who was held on a criminal charge by the Soviet authorities. The newspapers have been full of indignant comment on the affair, likening it to the assassination of the members of the Soviet Red Cross Mission by the Poles early in 1919. A certain note of internationalism has been preserved throughout these denunciations by referring to "aristocratic" and "landlords, Poland instead of denouncing the country as a whole There have been constant street demonstrations, and the Polish Embassy has been heavily guarded by police; but the demonstrations, as is usual in Moscow, well organized and have not been attended by any

4 4 4 The conference for strengthening the work of the Soviets, which first met last January, held its second session not long since. The conference is now turning its attention from the village to the city Soviets. Mr Yakovley, who delivered one of the chief reports at the session last week, pointed out that about 46 per cent of the electors in the cities are housewives, hand workers and others without any regular forms of organization The organized factory and office workers make up about 54 per cent of the voters. Mr. Yakovlev urged that more attention be paid to these unorganized classes of voters and suggested that the work of the town soviets would be improved if the non-Communist delegates were encouraged to offer criticisms freely and if every delegate were required to make a report on his activities before an audience of his electors.

4 4 4 The central committee of the Russian trade unions has just published a list of the categories of individuals who are deprived of the right of belonging to unions. The list includes the following classes: Merchants; joint owners and trustees; concessionaries; executives in apitalist enterprises who have the right to hire and dis charge labor: independent artisans; members of labor associations and communes; monks and priests of all religions; former officers of the White armies; person employed in the Tsarist police service; persons convicted for capital crimes and deprived of civil rights. Individuals may also be excluded from unions if they are convicted of capital crimes or of such offenses as breach of trust, bribery, theft, etc., and if they willfully and systematically refuse to carry out obligations imposed by the unions. Union membership is a very desirable object in Russia because of the privileges which it carries. The holder of a union card is favored in such matters as payment of rent and taxes, social insurance and unemployment relief; and it is exceedingly difficult for anyone who is not a union member to secure + + +

A Russian economist, Mr. Popov, estimates the country's national income for the last year at 13,500,000,000 rubles. The sources of this revenue, according to Mr. Popov, are as follows: Agriculture, 5,700,000,000 rubles; scale industrial production, 2,600,000,000 rubles; home trades and industries, 1,900,000,000 rubles; domes tic and foreign trade turnover, 2,400,000,000 rubles; transportation, 894,000,000 rubles. + + +

The Soviet Government is turning more and more attention to the problem of organizing trade. Felix Dzerzhinsky, president of the Supreme Economic Council, recently delivered a severe lecture on the mistakes and failings of the previous system of commercial organiza-tion before an audience made up of representatives of the state trading organizations. Mr. Dzerzhinsky de-clared that while the industries which are under his control have recently made considerable progress in the field of production, the work of the commercial apparatus has been unsatisfactory. The gap between wholesale and retail prices and the failure to supply distant regions with goods for which there is adequate demand indicate the existence of defects in organization which must be remedied.

Mr. Deershinsky was not content to lay all the blan on lack of capital; he mentioned excessive overhead cos and expensive duplication in the work of state tradit organs as important factors in the situation. He pr

nounced the private merchant indispensable in the field of retail trade. The general policy of the Government at the present time seems to be to strengthen the cooperatives in large industrial centers such as Moscow, Leningrad and the Donetz Basin, where it is especially advisable to stabilize the prices of bread and other staple food articles, but to give the private trader a freer hand in other fields, especially in the provinces. It is generally recognized that the severe restrictive policy which resulted in the closing of 200,000 private establishments last year is quite unsuited to the present needs of the country and that it must be abandoned in favor of a policy providing a greater toleration for the private

The Italian Embassy will soon have a new location on Vorovsky Street, where the British, Polish, Lithuanian and Afghan missions are already located. An Italian architect, Mr. Barzini, is expected to arrive in Moscow in the near future for the purpose of drawing up the plans for the new building. 4 ** *

Platon Mikhailovitch Kerzhentsev, who has just been appointed Ambassador to Italy in place of Mr. Jurenev, is very well known in Moscow theatrical circles as an ardent advocate of the new dramatic forms which have found expression in the work of Vsevolod Meierhold. Mr. Kerzhentsev has enjoyed a certain amount of diplomatic experience, having represented the Soviet Govern-ment in Stockholm in 1919. Before the revolution he was a journalist and writer on theatrical subjects. Lately he has acquired a new interest in the shape of NOT, the Russian abbreviation for Scientific Organization of Labor, and his writings on the modern Russian theater have been interspersed with articles on the Taylor System and other methods of promoting industrial

"The American Newspaper: What Is It?-Why Is It?"

"Homes for Homeless Dogs"

To the Editor of THE CHRISTIAN SCIENCE MONITOR: I wish to thank you for the editorial that you recently published under the caption "Homes for Homeless Dogs."
In it you speak of the dividends received from giving a homeless dog a home, and I would like to relate my experience along this line.

About a year ago I was driving near the water front, when I saw quite a number of people evidently quite scared and excited. I stopped and went up to look too, and found a puppy, about eight months old, manifesting every sign of great distress.

The crowd had about decided that the pup was mad

(as there was quite a scare here at that time), and no oubt would have had it killed, if I had not come up just then. I went up to it, wiped its eyes and mouth, and told it I would be its friend.

It seemed to understand, as it came with me at once. I took it to the game warden and told of finding it. The warden's reply was, "Will you keep it till someone in-quires for it?"

That was over a year ago, and the gratitude shown is xample to every person. The pup has grown into a add dog, always seeming to try to please, and can't express too much love under all circumstances. Moreover, at a recent dog show it took a prize. R. T. L. Newport News, Va.
